Educational Video Duplication Service
2005-2006 Catalogue
A Program of Saskatchewan Learning

Programs in this catalogue are available on either VHS videotape or DVD!

Distributed by Media Group
2710 Millar Avenue,
Saskatoon, SK S7K 4J4

Phone: (306) 933-4212
Toll Free: 1-888-682-8808
Fax: (306) 933-3183
Toll Free Fax: 1-877-444-3354

e-mail: vidlib@mg.sk.ca
website: www.sasked.gov.sk.ca/video

This catalogue is produced for Saskatchewan Learning as a service to clients and all eligible users of the Educational Video Duplication Service.

This catalogue supercedes and replaces any previous catalogue listing video programming provided through Saskatchewan Learning.

For the most up-to-date catalogue of video listings check out the website: *www.sasked.gov.sk.ca/video*.

Media Group - Saskatoon

Saskatchewan Learning's educational video programs are duplicated by Media Group, a full service video production and post production company in Saskatoon.

Media Group is committed to delivering this service quickly, accurately and always with the needs of you, the client, in mind.

Media Group can fulfill your requests through the toll-free telephone service, fax, e-mail and at the Educational Video Duplication Service Internet site. ***(www.sasked.gov.sk.ca/video)***

New Account Numbers Needed to Use the Service

Media Group requires that users of the service register for account and contact numbers prior to taking advantage of this terrific resource collection. Because of copyright restrictions on this programming, all clients of the service must be registered before duplication orders can be fulfilled.

Give Media Group a call at the toll-free number ***(1-888-682-8808 or 933-4212 in Saskatoon)*** to receive your account and contact numbers.

Teacher's Guides - Distributed by Media Group

Several teacher guides are available to teachers and students that support and enhance the educational video programming. Teacher guides accompanying certain programs are distributed by Media Group. See details in the catalogue for cost and availability. Guide prices are subject to change during the catalogue year.

Visit Our Homepage

www.sasked.gov.sk.ca/video

The Internet provides a fast and up-to-date communication tool. Our homepage details everything you need to know about the service and even provides a form to ***order on-line***.

This catalogue is now on-line, providing you with the most up-to-date information and the most recent additions to the educational collection.

Visit us on the Internet at ***www.sasked.gov.sk.ca/video*** today.

Who Can Use This Service?

The Educational Video Duplication Service is co-ordinated by Saskatchewan Learning for the use of educational institutions, non-profit organizations and government departments in Saskatchewan.

Restrictions on Programming

Each program that is available through the Educational Video Duplication Service has copyright information describing who is eligible to make use of it. For example, some programs are available for use only by K-12 schools, colleges and universities, while others may have no restrictions.

Permission to use many programs is granted by the copyright holder for a limited time basis. Access to these programs is granted provided that the user agrees to erase the program by the Erasure Date. Media Group will remind all clients of upcoming erasure dates.

A *"Non Erasure"* designation following the stated erasure date means that the program can be duplicated to the date shown but once duplicated can be used for the life of the tape.

Check the catalogue for details concerning the program you're interested in.

What You Need to Know About Copyright

All programs listed in this catalogue are protected by copyright. The Educational Video Duplication Service provides them for non-commercial use. These programs may not be duplicated, edited, broadcast, cablecast, loaned or otherwise distributed without the prior written permission of the copyright holder or its representatives.

Failure to adhere to these conditions is considered to be an infringement of copyright and is punishable by law. All liability for wilful copyright infringement will be placed on the account holder.

Please ensure that all users of programming in your organization understand the importance of adhering to copyright restrictions.

Media Group does not condone the duplication of programs unless specifically allowed by the Copyright Act, Licence Agreements or the written permission of the copyright owner.

How to Use this Catalogue

The Educational Video Duplication Service distributes programming available on videotape and the Teacher's Guides which accompany particular programs.

This catalogue lists nearly 3000 programs available to you on video. *(To check on the most recent additions made to the collection after the printing of this catalogue visit the webpage at www.sasked.sk.ca/video.)* It is divided into three sections:

- Series Index
- Individual Program Listings
- Subject Index

(The Teacher's Guides are listed with the individual programs.)

Series Index

The first section of the catalogue is an alphabetized listing of each series available through the Educational Video Duplication Service. The individual programs associated with each series are detailed under the series title.

Individual Program Listings/Teacher Guides

Each individual program is listed in the catalogue. Details provided about each program include: title; video program number; producer; date produced; length of program; intended audience; description of the program; suggested uses; copyright restrictions; erasure dates; sponsor; and information about the teacher guide (where applicable) including the guide number, the title on the guide and its price.

If a teacher guide accompanies the video program, it is listed at the end of the individual program listing. Prices of guides are provided. Order using the Guide number (**G** number) or the title.

Subject Index

The final section of the catalogue is the Subject Index. Each program has been assigned subject headings using the ***Sears List of Subject Headings, Canadian Comparison***.

Use this reference to assist you in choosing the right program for your needs.

How to Read a Program Listing

Video Title

Production Company

Now What Do I Do

Video Program No. — **V9770 Agency For Instructional Technology**

Year Produced — 1996 13 Min. Gr. 3-5 — **Audience**

Program Length

Program Description — This program explores the emotion of frustration and shows how goal-setting skills can be used to deal effectively with frustration. This program will assist students to show how it looks and feels to be frustrated; identify causes and effects of frustration; identify and use goal-setting skills to deal with frustration; recognize that frustration is a natural response to being unable to achieve a goal, and that positive ways exist to deal with it in a healthy way.

Suggested Use for curriculum support — Suggested Use: Health Education, Grades 3-5, Self-esteem, Social Relationships.

Copyright Information — Duplication restricted to K-12 schools, colleges and universities only.
Erasure Date: Perpetuity

Sponsorship — SPONSOR: SCN/Saskatchewan Learning

GUIDE:

G9768 Looking From The Inside Out — **Teacher's Guide Information**

Teacher's Guide Price — $15.10

G9769 Looking From The Inside Out Kit

$21.90

Steps in Placing an Order

1. Register with Media Group: sign a statement agreeing to abide by all copyright restrictions and receive an account number.

2. Prepare your order ahead of time. Decide if you want to use tape stock provided by Media Group or if you want the programs duplicated on your own videotape. Check with Media Group to ensure your tape meets minimum requirements. If you choose to supply your own videotape please consider cost of shipping as well as time required to ship to Media Group. If you choose to have your programs duplicated on DVD Media Group will supply the blank DVDs.

3. You can order an individual program by its **V** number, a complete series by its **S** number, and a teacher guide by its **G** number.

4. Contact Media Group by:
    - Phone: **Saskatoon 933-4212 or Toll-Free 1-888-682-8808**
    - Fax: **(306) 933-3183 or Toll-Free Fax 1-877-444-3354**
    - email: **vidlib@mg.sk.ca**
    - website: **www.sasked.gov.sk.ca/video**

5. If your order includes several programs, sending it by fax, email or website will be a time-saving option for you.

6. Your order will leave Media Group within five business days of receiving it.

7. Your order will be delivered to your door by Canada Post. It will include a packing slip.

8. An invoice detailing your duplication service fees, cost of blank media, teacher guides, shipping charges and appropriate taxes will be sent under separate cover to your billing address.

Commitment to Service

Media Group and Saskatchewan Learning want to provide you with easy and reliable access to quality educational programming available on videotape and DVD.

If you are having any problems getting the results you need, please do not hesitate to contact Media Group at 1-888-682-8808 (933-4212 in Saskatoon).

There are terrific programs in this catalogue and they are here for you!

Acid Rain
V9272 Agency For Instructional Technology
1988 29 Min. Gr. 10-12
Acid deposition - much of it from power plants in the Midwest - results from an expanding economy, affluent lifestyle, convenient transportation, and plentiful energy, and it can damage lakes, forests, buildings, and artifacts - especially in the Northeast and Canada. The situation sets the East against the Midwest, and Canada against the U.S., both politically and economically. The chemistry of acid rain can vary, and opinions about the nature and severity of the problem and the best way to deal with it diverge widely.
Duplication restricted to K-12 schools, colleges and universities only.

Algonquin Park: Crossing Algonquin
V995 Summerhill Entertainment Inc.
2001 25 Min. Gr. 5
Jennifer and Jamie explore the winter wonderland of Ontario's Algonquin Park and surrounding area. This park that covers 7725 square kilometers is one of the largest in Ontario and was established over a hundred years ago as a wildlife sanctuary. It is situated on the Canadian Shield, a geological region that gives the park its distinctive vegetation and mineral composition. Sarah Gunter shows them how to get around the park in the winter by dogsled and they enjoy the natural beauty of the park and look for animal tracks. Rick Stronks, the park's chief naturalist, takes them snowshoeing to tell them how wildlife lives in the park in winter. They learn about the park's famous wolves that communicate through howling. They are introduced to a yurt, a structure ideal for winter camping, and they plan to spend the night. Later they visit nearby Bancroft, the Mineral Capital of Canada. Bancroft is located where two of the earth's crystal plates meet. They learn how minerals are formed. Suggested Use: Social Studies, Grade 5 - Unit 1; Science, Grades 4-7.

Alistair MacLeod
V2296 Canadian Council Of Ministers
1984 15 Min. Gr. 10-12
At his home with his family in Cape Breton, MacLeod talks about his upbringing and education. He is seen at a lovely cabin perched on an isolated stretch of the coastline where he writes. He says that he has been lucky with his writing, as almost everything he has written has been published. He writes mainly about a small area of Nova Scotia and describes how he writes short stories. An illustrated excerpt of 'The Boat' from his book 'The Lost Salt Gift of Blood' is read. MacLeod reflects on the story, which deals with tradition and the concept of choice. He expounds on what a short story means to him and what the reader may get from reading one. Nova Scotia has had a great effect on his writing he considers the province as his emotional landscape. MacLeod concludes with the hope that he leaves behind something worthwhile which has been inventive and imaginative.

America Brakes for Safety
V503 ABS Education Alliance
1998 7 Min. Gr. 10-12
The keys to proper use of the ABS technology are to recognize how the vehicle is equipped, recognize when ABS is functioning, and perform techniques of firm braking and limited steering. Knowing these key factors and elements will allow the driver to take full advantage of this braking technology. ABS technology does not affect the normal operation of the conventional braking system in any manner. The vehicle's brakes will feel and operate like a conventional system until any impending wheel lock occurs to activate the ABS system. Suggested Use: Driver Education; Mechanics; Grades 10-12.

Anne Herbert
V2287 Canadian Council Of Ministers
1990 15 Min. Gr. 10-12
Quebec poet Anne Herbert outlines some aspects of her life in a literary family. She describes, as well, the high incidence of death in the large families of that era. This experience, she feels, continues to find expression in many of her poems. At another point in the program she tells how poems appear almost complete in her mind. Indeed, by the time she begins to write it is simply a matter on committing a poetic entity to paper. In the course of the program, Miss Herbert reads selections from the collection 'Poemes', in particular 'Vielle Image', 'Vie de Chateau', 'Je suis la Terre et L'eau'. The interview and readings are in French with either subtitles or voice-over English translations.

L'Anse Aux Meadows, Newfoundland: Voyage to Vinland
V6862 Good Earth Productions
1999 24 Min. Gr. 5, 12
In 1000 AD, five centuries before John Cabot set foot on the shores of Newfoundland, a Norse expedition led by the legendary Leif Erickson explored the New World. They established a camp in the region which, after the discovery of wild grapes, they named "Vinland", the Land of Wine. In 1960 a Norwegian couple on a quest to find the legendary site discovered that overgrown ridges near L'Anse Aux Meadows were actually the foundations of Norse buildings from the 11th century. During the excavation, hundreds of artifacts shed light into the lifestyle of these self-sufficient and resourceful Norse explorers. L'Anse Aux Meadows was the first cultural discovery in the world to receive recognition as an UNESCO world heritage site. Suggested Use: Social Studies, Grade 5-Unit 2; History, Grade 12-The People and the Land.

Arrangement in Grey and Black No 1: Portrait of the Artist's Mother

V3289 BBC Enterprises

2004 50 Min. Gr. 10-12

In this series, viewers discover fascinating stories behind renowned and iconic works of art. In 1871, for James McNeill Whistler to call a portrait of his mother, 'An Arrangement in Grey and Black', was very provocative. To refer to one's mother as an 'arrangement', however devotedly the arrangement was painted, did not go over well in Victorian times. It contradicted what Americans today call 'family values', which Whistler viewed as cultural baggage. Today Whistler's painting is celebrated as an artistic masterpiece and is well-known and well loved. It has been satirized over the years with Whistler's mother appearing with all kinds of things. Ironically, it has, over time, become a powerful icon of motherhood. Suggested Use: Arts Education, Grade 10-12 - Visual Art.

Duplication restricted to K-12 schools, colleges and universities only.

Artbot Series
V1214 TV Ontario
2004 34 Min. Gr. 2-8
Children have the opportunity to learn about key elements and kinds of art as well as observing a site visit with a professional artist who discusses his/her love of art and also demonstrates his/her related techniques and approach. Young people also share their works of art and their views on the value and rewards of creating art. The program is composed of ten segments including the key elements: Line discusses its importance to art, and various uses such as creating patterns and rhythms, and expressing movements and emotions. Shape examines the types of shapes in art: organic and geometric; what various shapes represent; and creative possibilities by combining shapes. Texture discusses texture; examples of materials that give texture; and the appeal of incorporating texture into art making. Space looks at the importance of space in art; how artists create space; and the uses of foreground and background to create a sense of closeness or distance. Colour explains primary and secondary colours, how artists use colour to convey their emotions; colour's potential to bring definition, depth and brightness to a work of art, and how an artist blends colours. Other segments examine kinds of art: Painting looks at the origins and techniques of painting, from prehistoric times, to the many options available for artists that paint today; the important role of painting, such as recording our history or expanding our imagination; and artists' revelations on why they paint. Photography discusses the origins of photography; why photography is such a powerful medium; and the appeal of digital cameras. Drawing looks at the meaning and value of drawing; how it is a process of discovery; and the freedom of expression, flexibility, and convenience it provides the artist. Sculpture discusses what sculpture is, and its tactile appeal, both to the artist and the viewer, and the pleasures of sculpting with various materials, such as wood, glass, clay. Artists working in these materials discuss their work. Mixed Media gives viewers an explanation of mixed media, or collage that involves using two or more media. The program also discusses the wide range of media available, including paints, photographs, newspaper, or found objects, and the rewards of being a mixed media artist. Suggested Use: Arts Education, Grade 2-8 - Visual Art.

Atmospheric Circulation
V514 Classroom Video
1996 23 Min. Gr. 10
This program explains why the world has an atmosphere that is constantly in motion. It shows how the general circulation of winds and pressure systems form and operate to produce changing patterns of weather and climate over the surface. Through the use of graphics and models, this program explains the forces at work in the atmosphere, such as the Greenhouse Effect and the Coriolis Effect. From a global perspective the processes involved in atmospheric energy transfers, air pressure systems and wind belts are clearly described. Suggested Use: Science, Grade 10 - The Greenhouse Effect; Geography, Grade 10.
Duplication restricted to K-12 schools, colleges and universities only.
EXPIRY DATE: 2006-8-31
SPONSOR: SCN/Saskatchewan Learning

Autism Videoconference With Dr. Temple Grandin, Part 1
V9428 Saskatchewan Learning
1996 60 Min. A

This is part one of a two part program. On January 16, 1996, Saskatchewan Learning's Special Education Unit hosted a conference on autism. The conference featured a presentation by Dr. Temple Grandin, who is an adult with autism who has a highly successful career. Dr. Grandin spoke via closed-circuit television transmission from Fort Collins, Colorado to video audiences in Regina and Saskatoon. In the presentation, Dr. Grandin discusses her experiences as a child growing up with autism. She also addresses some of her personal adaptations that she has made in order to cope with the world. A question and answer session with the teleconference audiences follows her talk. She now is a professor of Animal Science at Colorado State University and has gained world-wide recognition for the livestock-handling systems that she has designed.

Autumn
V3299 Storytellers Productions
2002 24 Min. Gr. 1-12
Legend of the First Thanksgiving: Sharing is a way to give thanks for the bounty around us. As the leaves were falling, Raven tricked the other animals into providing a great feast before winter arrived. Harvest, Thanksgiving, or Potlach, the feast tradition carries on for all animals, including humans. This story outlines the details of how animals prepare for winter. Wesakechak and the Medicine: This story shows that abusing medicine can be dangerous. On a beautiful day Wesakechak sees two chickadees getting extra energy from their special medicine berries. He begs them to share, and they do, but they caution him to take only one at a time and only when he is very tired. Wesakechak overdoes it. He also sees two cranes tossing their eyes to the sky to improve their eyesight. Again Wesakechak begs for the secret and overdoes it, and loses his sight. Eventually the Creator restores his sight, but first makes Wesakechak promise that he will not abuse strong medicine again. Suggested Use: Arts Education, Grades 1-12 - General, Visual Art, English Language Arts, Grade 3- Social, Cultural and Historical Context, Grade 4 - Imaginative and Literary Context; Health Education, Grade 3 - A Healthy Body; Native Studies, Grade 10 - Unit 2 Community and Kinship; Science, Grade 3 - Animals; Social Studies, Grade 9 - Culture.

Aviation
V6844 Third Wave Communications
1999 24 Min. Gr. 6-9
This show is a journey into the aviation industry. Nearly 53,000 Canadians work in commercial aviation, thanks to a booming business that transports more than 1.4 billion people worldwide. The sky is definitely not the limit in this industry. Since the Wright brothers achieved the first ever plane flight in the early 1900's, aviation has primarily employed men. Briefly, during the Second World War, women became pilots, aircraft mechanics, riveters, and took on other non-traditional roles. Well, guess what? They're back! You'll meet three women whose careers have truly taken flight in aviation- a Maritime Patrol Crew commander and a pilot as well as an aircraft structures mechanic. Suggested Use: Career Guidance: Grade 6-9 - Career Awareness, Exploration and Planning.

Batoche Settlement, Saskatchewan: Four Bloody Days in May
V6699 Good Earth Productions
1998 24 Min. Gr. 9-12
Batoche is the story of a young nation's loss of innocence. It is here that a battle was fought over four days that changed Canadian History. The Prime Minister, John A. MacDonald and the Métis leader, Louis Riel went head to head and the results of this confrontation still resonate. Twenty-five men eventually lost their lives on the battlefield and it would be another five days before Riel turned himself in. He would be hanged for his part in the rebellion, a controversial penalty that is still debated to this day. This program reveals what happened when western expansion met Métis resistance. Suggested Use: History, Grade 12 - The Nineteenth Century: Road to Democracy; Native Studies, Grade 12 - Social Development; Social Studies, Grade 12 - Change; Social Studies, Grade 12 - Culture.

Behind the Screens: Hollywood Goes Hypercommercial
V3614 Media Education Foundation
2000 37 Min. Gr. 10-12
While Hollywood has always been a commercial system, this program presents compelling evidence that suggests that we have entered an era of 'hypercommercializaton'. It tracks the rise in product placements, tie-ins with fast-food chains, and toy merchandising deals. Six interviewees - four leading scholars, a screen writer, and an independent filmmaker - provide compelling arguments that mainstream, big-budget movies have become a vehicle for advertising and marketing. Products move to centre stage in powerful narratives. Our values/stories are cluttered with commercial messages. Commercialism has destroyed the enterprise of making great movies. A study guide can be found at Media Group or online at: www.mediaed.org. Suggested Use: Communications Production Technology, Grade 10-12 - Legal and Ethical Issues; English Language Arts, Grade 11 - Media Studies; Life Transitions, Grade 11-12 - Community Issues and Ethics; Social Studies, Grade 10-11 - Unit 1

Best Wishes
V9136 TV Ontario
1994 15 Min. Gr. 1- 2
Trying to raise money for the Old Woman who lives in a Shoe, Mathica absentmindedly rubs one of the articles left to sell - an old lamp. Lo and behold, Jamil the genie appears. While granting the genie two wishes, Mathica must measure the genie's head, and show him how various plane shapes can fit into a hexagon. A third wish fulfills Mathica's fund-raising goal. Mathematical content: number, subtraction of numbers to 50, place value - 99, counting by 3s and 4s; measurement: linear; geometry: plane figures - triangle, square, trapezoid, rhombus, hexagon; data management: interpreting graphs. Suggested Use: Mathematics, Grades 1-2.
Duplication restricted to K-12 schools, colleges and universities only.

Between the North Pole and New York City
V3615 Cooper Rock Pictures Inc.
2004 48 Min. Gr. 10-12
This documentary tells the story of what an important destination Emma Lake was for leading artists from Canada, United States and Britain for five decades. It examines the impact that the Emma Lake Artists' Workshops have had on the Canadian and International art scenes. For more than thirty years some of the most famous artists in the world travelled to a rustic camp at Emma Lake in Northern Saskatchewan. The program includes interviews with artists such as Frank Stella, Kenneth Noland, Dorothy Knowles, Wynona Mulcaster, Robert Murray, and Sir Anthony Caro. (Cautionary note for teachers: Frank Stella, a famous New York artist, makes a comment that perhaps the artists were too stoned in the sixties.) This is an excellent program to support Saskatchewan Art History. Suggested Use: Arts Education, Grade 10-12 - Visual Art.
Duplication restricted to K-12 schools, colleges and universities only.
EXPIRY DATE: 2010-8-31
SPONSOR: SCN/Saskatchewan Learning

Beyond Planet Earth
V8944 International Telecommunication Services Inc
1993 15 Min. Gr. 6-9
Briefly chronicles the history and milestones of flight and rocketry from the myth of Icarus to the building of an international space station. The main scientific principles discussed are aerodynamic lift, rocket thrust, and orbits. Duplication restricted to K-12 schools, colleges and universities only.

The Big Break (Media)
V3502 Agency For Instructional Technology
1990 15 Min. Gr. 6-9
Deborah, 17, is offered a job as a model for Dazzle Berry Vodka Cooler Company's nation-wide advertising campaign. Ecstatic at first, she notices that her 13 year-old friend, Alex, is cool about her prospects, and her parents are troubled about the idea of her advertising alcoholic beverages. She and her friends discuss the effect of advertising on their views, and she and Alex visit a record shop to learn about the impact of its recent ads. Deborah's agent tries to persuade her that it would be stupid to turn down the job because if she doesn't do it, someone else will. Later, she discovers that Alex's father has a drinking problem. Deborah has to decide whether she will accept the modelling job. This program is open-ended.

Body Image
V19 Sport Medicine and Science Council of Saskatchewan
1998 28 Min. Gr. 6-9
The human body comes in many different shapes and sizes. There is no perfect look. Yet, all around us, on television, in movies and magazines, we are told otherwise. Influenced by the growing power of the media, our young people continue to be confronted with new standards for physical beauty. For many, these standards are impossible to reach. In trying to live up to what they see in fashion photographs, our youth run the risk of doing damage to their health and their self-esteem. They need to know that it's "okay" to be who they are. Body Image is designed to do just that, to separate media hype from reality, to help young people make the right choices and develop an effective, healthy lifestyle. Suggested Use: Health Education, Grades 6- Body Image & Nutrition.
Duplication restricted to K-12 schools, colleges and universities only.
EXPIRY DATE: Perpetuity

Body Shapes: Accepting Our Natural Body Shape
V3082 Classroom Video
1999 16 Min. Gr. 6
This program looks at body image and gender stereotypes and how they relate to eating disorders. The views of both young men and women are included on the mixed messages they receive about what is desirable and healthy in regard to body size and shape. Discussion about the 'ideal' body and how it has changed over time in relation to changing culture and fashion is presented as well as an explanation of three basic body types: ectomorph, endomorph, and mesomorph. Young people speak frankly about societal pressures on how to look and the powerful influence of advertising. An interview with a person with anorexia illustrates the insecurity and depression many young people have about body image. Suggested Use: Health Education, Grade 6 - Body Image and Nutrition.

Brenda and Edward / Adam
V4086 Multi Media Group of Canada
1984 14 Min. Gr. K-5
Brenda and Edward - Brenda and Edward lived in a cosy box. One day, Edward was late for work and left too fast to bring his dinner. Brenda ran after him but he could not hear her. She will get lost and Edward will look everywhere for her. Will they find each other? Adam - Adam goes to nursery school and lives alone with his daddy, Dave. Together they laugh, cook and watch T.V. But sometimes, they have their own little squabbles, and sometimes they laugh when his daddy makes jokes. Adam's story deals with the single-parent family with simplicity and realism. Suggested Use: English Language Arts. Duplication restricted to K-12 schools, colleges and universities only.

Bruce Peninsula, Ontario: Loose on the Bruce
V3597 Summerhill Entertainment Inc.
2002 25 Min. Gr. 5
In the Bruce Peninsula area of Georgian Bay the waters and islands around Tobermory are explored as well as the fascinating ecosystem of the dolomite cliffs and the Niagara Escarpment. Here lives Canada's only venomous snake and species at risk, the Massasauga Rattlesnake. With snorkels they explore the shipwrecks of Fathom Five National Marine Park of Canada, the first marine park in Canada, and learn how First Nations oral traditions led to the mapping of Fathom Five. Jay tells about the maritime history of the Great Lakes, why there were so many shipwrecks in this area, and demonstrates how the Niagara Escarpment was formed. Suggested Use: Social Studies, Grade 5 - Unit 1; Unit 2; Unit 3; Science, Grades 4-7.

Bully Dance
V3592 National Film Board of Canada
2000 11 Min. Gr. 7-8
Through the dance of animated cartoon characters the bullying of one small character by a group of other stick creatures is as relentless as the beat of the percussion band that provides the background music. The victim is gradually marginalized by tormenters as bullying incidents increase in intensity. This program shows how the everyday activities of all the other children in the school are unaffected by the bullying until serious harm is inflicted on the victim. It is only then that the community takes action. Complaints result in implied violence on the part of the bully's parent. This program can be useful for opening discussions on conflict resolution and inclusion. Suggested Use: Health Education, Conflict Resolution, Family and Community Violence, Grades 7 - 8.
Duplication restricted to K-12 schools, colleges and universities only.

Cape Breton: A Place Apart
V981 Summerhill Entertainment Inc.
2001 25 Min. Gr. 5
Jamie and Jennifer explore Nova Scotia's eastern island, Cape Breton. They learn how the region's Gaelic culture mixes with its natural history. In Sydney they meet Kelsey MacNeil who shows them step dancing at a traditional Ceilidh on the docks. Kelsey, who lives on the banks of Bras d'Or Lake, one of the world's only inland seas, also takes them kayaking. They move on to meet Eugene Eagle Denny, a sixth generation Mikmaq medicine man, and also an eagle conservation expert. He explains why the area has so many bald eagles and their spiritual significance to the First Nations people. Cape Breton was one of Canada's most important coal mining regions. They visit Hinson Calabrese, a retired coal miner who works at the Coal Miner's Museum in Glace Bay. They learn how coal beds were formed millions of years ago from dead vegetation and peat.
Suggested Use: Social Studies, Grade 5 - Unit 1; Science, Grades 4-7.

Case Studies in Community Development, Video Three
V6634 Saskatchewan Health
1998 89 Min. Adult
This three-video series will be of interest to staff of district health boards, staff and community representatives from the social services, education, justice, agriculture, municipal government, environment and economic development sectors. It will be useful to individuals or groups that use a community development approach in their work. The series, originally produced on January 28, 1998 as a distance education program, was sponsored by Saskatchewan Health in co-operation with the ten-member Interdepartmental Committee on Community Development. Other partners included the Saskatchewan Council for Community Development, Health Canada and Prairie Region Health Promotion Research Centre. Video Three features the following groups discussing the issues and challenges of community development. Saskatoon Communities for Children - Peter Prebble and Robin Mitchell present the intersectoral partnership that works on behalf of children in the Saskatoon area. Town of Outlook's Waste Management Program - Joanne Fedyk, Saskatchewan Waste Reduction Council, and Rick Pederson, Town of Outlook, discuss their project and its environmental, economic and public health impacts. Agricultural Health and Safety Initiative - Mary Smillie, Midwest Health District, outlines her approach to tackling agricultural health and safety issues in rural communities.

Chilkoot Trail, British Columbia: The Meanest 32 Miles in History

V6703 Good Earth Productions

1998 24 Min. Gr. 12

The stampeders of the Klondike Gold Rush described the Chilkoot as the meanest 32 miles in history. Between 1897 and 1899, thirty thousand people crossed the Chilkoot Trail en route to the gold fields of the Klondike. They were required by law to haul one ton of goods over the Chilkoot Pass - all the equipment and supplies they would need to survive in the Yukon while seeking their fortune. In winter, they endured freezing temperatures and whiteouts. Summer brought an agonizing combination of rain and insects. Some Klondikers were defeated by the Trail and abondoned their journey altogether, and of those who continued, very few actually struck it rich. Suggested Use: History, Grade 12 - The Nineteenth Century: Road to Democracy; Social Studies, Grade 12 - Change.

Duplication restricted to K-12 schools, colleges and universities only.

CHILL: Straight Talk About Stress

V6727 Meridian Educational

1995 22 Min. Gr. 9-12

This program is intended to present information about handling day-to-day stress or beating the blues. The key is to find a physical, emotional and mental balance, with stress in our lives. The C.H.I.L.L. formula offers a way young people can handle stress: C-communicate; H-health, regarding nutrition, I-"I" concerns, such as self-esteem and image; L-laid back, including relaxation techniques; and L-little at a time, as in time management. Young people talk about what stresses them, where stress comes from, and what helps them deal with stress. The program contains upbeat messages that encourage teens that they have the ability to deal with the stresses in life. Suggested Use: Health Education, Grade 9; Life Transitions, Grades 11-12; Wellness, Grade 10.

Duplication restricted to K-12 schools, colleges and universities only.

Climate
V9278 Agency For Instructional Technology
1988 29 Min. Gr. 10-12
Human activity is affecting the natural cycles of the Earth's climate. Carbon dioxide from the burning of fossil fuels is creating a possible "greenhouse effect". Climatic changes have enormous impact on our economies. Computer models and satellites have improved our forecasts, especially for the very near future. The Global Climate Protection Act of 1989 requires the government to develop a policy toward the suspected causes of global warming, but our knowledge is still very imperfect. Some possible solutions would be drought-resistant crops, reforestation, and alternative energy sources.
Duplication restricted to K-12 schools, colleges and universities only.

Counting and Symbolizing
V625 National Council of Teachers of Mathematics
2000 15 Min. Gr. K-2
The Monsters are invited to help Cousin Digit do an inventory of fish at his fish store. Because the fish are moving around, it is difficult to get an accurate count. A variety of counting strategies are explored to help the Monsters come to understand one-to-one correspondence. Their first attempt is to actually draw pictures of the fish on a piece of paper to represent those in the tank. Another attempt involves the use of colour tally marks. Once the exact number of fish is determined, the Monsters explore ways to symbolize the information. The field trip is to a museum where they learn how other cultures and peoples who lived in earlier times symbolized their numbers.
Suggested Use: Mathematics Grades K-2.
Duplication restricted to K-12 schools, colleges and universities only.

V3271 marblemedia/Sinking Ship Productions
2004 30 Min. K-1
At the art gallery, six-year old Daniel Cook learns about priceless paintings and hundred year old sculptures. Daniel joins artist Barbara Reid and learns how to create plasticine art, and together they create a tornado plasticine scene. With Robert Bateman, Daniel learns how to paint animals and together they paint a giraffe eating from a tree. Daniel watches artist Michael Martchenko, and learns how to draw a dragon before creating his own three-headed robotic dragon. Daniel also learns how to work clay into a dragon shape and paints his clay dragon before putting it in the kiln. A companion interactive website and teacher's page can be found at: www.thisisdanielcook.com.
Suggested Use: Arts Education, Grade 1 - Visual Art.
Duplication restricted to K-12 schools, colleges and universities only.

Cricket the Trobriand Way: A Case Study in Culture Change
V9812 Magic Lantern Communications
1983 29 Min. A
This lesson studies the Trobriand Islands in New Guinea; the site of a fascinating example of syncretism, the process by which one culture adopts a "foreign" practice and integrates it into the home culture. In this case study, the practice is the game of cricket, introduced by the British and the Australians and now played by the Trobriands in a totally unique way. The lesson shows how the present form of the "game" reveals political, social, and economic processes adapted from Trobriand culture. By understanding Trobriand cricket, students can appreciate how Trobrianders have both changed their culture and, at the same time, retained the attitudes and practices important to them.
Duplication restricted to K-12 schools, colleges and universities only.

Dance at the Moulin de la Galette
V3290 BBC Enterprises
2004 49 Min. Gr. 10-12
Dance At The Moulin de la Galette is described as the most beautiful picture of the 19th century and is loved for its joie de vivre. It was painted by Auguste Renoir in 1876 and depicts a lively Sunday afternoon at the Moulin de la Galette dance hall in Montmarte. Although the painting has a celebratory tone, Paris was then still recovering from its most bloody and turbulent time, and the Moulin de Galette dance hall had been at the centre of it all. The program tells how Renoir loved the dance hall that was very close to his studio. He attended the Sunday afternoon dances and loved to paint the local girls. A few years earlier, the Moulin de la Galette had been occupied by a resistance group, the Commune, that was badly overthrown by government troops in 1871. In his painting, Renoir created an illusionary world because the lives of many women and children at the time were very difficult due to the hardships and poverty they endured. Suggested Use: Arts Education, Grade 10-12 - Visual Art.
Duplication restricted to K-12 schools, colleges and universities only.

Dangerous Games
V377 Partners In Motion
1998 24 Min. Gr. 6-12
The Think First Foundation of Canada estimates that every year 40,000 Canadians sustain permanent brain or spinal cord injuries. Statistics show that the most frequent cause of these injuries are motor vehicle crashes, falls, sports and recreation. These injuries are the leading cause of death for persons under the age of 34. Young people, ages 14-25 years account for one third of these injuries. The average age is 18 years, with males twice as likely to be injured as females. Host Amanda Bzdel presents the stories of several people whose lives have been forever altered by careless mistakes, and presents ways in which people, young and old alike, can learn to be more careful. Through re-creations and interviews, Dangerous Games presents the all-too-real drama behind brain and spinal cord injuries. With the intent to persuade teenagers that they are not invincible, the show aims to prevent injuries before they happen. Suggested Use: Health Education, Physical Education, Grades 6-12; Wellness, Grade 10.

Dawson City, Yukon: Heart of the Klondike
V6860 Good Earth Productions

1999 24 Min. Gr. 5, 12

The Klondike Gold Rush grabbed the world's attention just over 100 years ago. Thousands of adventurers headed towards the newly-discovered gold fields in their desire to get rich quick. Most of them ended up in Dawson City at the fork of the Yukon and Klondike rivers just 300 kilometers below the Arctic Circle. In just one month in 1898, Dawson City exploded from a village to a city of 30,000. It was the largest city north of San Francisco. The invading army of prospectors culled twenty-two million dollars worth of gold in a 12-month period alone. Most of the people lived in hundreds of tents and crude log cabins that offered scant shelter against winters that plummeted to minus 50C. The only permanent buildings were saloons, hotels or theatres. Fortunes were made and spent quickly. Gold fever deserted Dawson City in 1905 just as quickly as it had first swept through the town. The population dwindled from 30,000 to 5,000 and everyone expected Dawson to crumble into dust like so many other gold boom towns. Somehow it survived. Gold still lures thousands of people (tourists) to this northern outpost but only to savour a nugget of frontier history. Suggested Use: Social Studies, Grade 5 - Unit 2; History, Grade 12 - The Nineteenth Century: Road to Democracy.

Dawson City, Yukon: The Yukon Quest
V996 Summerhill Entertainment Inc.

2001 25 Min. Gr. 5

Jennifer and Jamie visit Dawson City to learn about the Klondike Gold Rush. With thirteen-year-old Gemma Gould, whose family has been in the area for over 100 years, they explore some of Dawson's historic buildings, many of which have been jointly declared a National Historic Site. They visit a placer mine claim to learn about the history of the Gold Rush and why mining is still important today. They have arrived in Dawson City in time for the 36 hour layover of the Yukon Quest dog sled race that is considered the world's toughest dog-sled race between Fairbanks, AK and Whitehorse, YT. They see where the forty-one teams and almost 600 dogs rest and are checked by veterinarians. Later they meet First Nations' guide, Freda Roberts, at the Trondek Hwech'in Cultural Centre and learn that originally the Han peoples used the area around Dawson City as a seasonal fishing camp. They set off on skidoos with two local Han guides to visit the Moosehide Reserve that was founded during the Gold Rush as a place away from the frenzy of Dawson where the Han people could maintain their traditional lifestyle and heritage. Today this site is mainly used in summer for traditional ceremonies. They also learn how gold is formed and why placer mining and panning is the best way to extract it from the ground. Suggested Use: Social Studies, Grade 5 - Unit 1; Science, Grades 4-7.

Decisions (Decisions & Actions)
V3506 Agency For Instructional Technology
1990 15 Min. G, Gr. 6-9
Twelve year-old James is under stress because of his parents' divorce, his mother's long work hours, his father's departure from town, and his responsibility for his younger brother. Although he is a talented drummer, even his work in the school band is slipping, and he misses his father's encouragement and coaching. In spite of the support offered by his band director, who is considering nominating James for a music camp scholarship, he gives in to his feelings of powerlessness, breaks his drum, and yields to pressure from Andy (and the bribe of a new drum) to spend the evening drinking. His actions have disastrous results when, during a fire, his drink-induced sleepiness endangers his little brother. However, with another decisive act, he casts off Andy's influence, takes charge of himself again, and returns the drum that Andy has given him. Suggested Use: Health Education, Grade 6 - Drug Addictions and Gambling, Grade 7 - Alcohol and Other Drugs, Grade 8 - Family Structure, Roles and Responsibilities.

Diefenbunker Nuclear Shelter, Ontario: Canada's Worst Kept Secret
V6704 Good Earth Productions
1998 24 Min. Gr. 12
In 1959 during the uneasiness of the Cold War Prime Minister John Diefenbaker ordered a 25 million dollar underground bunker to be built. Its purpose was to protect the cabinet from a nuclear attack by the Russians. The "Diefenbunker", as it became known, was built on the site of a small military base twenty minutes outside of Ottawa. The Cold War caused a quiet panic in Canada in the 1950's. The bunker was a product of that fear. It has been emptied and sealed now, but the "Diefenbunker" is a time capsule that reflects the deepest fears of an era and a nation held captive by a war that never was. Suggested Use: History, Grade 12 - Activist Government and the National Wellbeing; Social Studies, Grade 12 - Globalization.

Don't Risk Your Life
V2238 Partners In Motion
2003 15 Min. Gr. 7-12
Don't Risk Your Life is a short educational drama that helps to educate young people about their rights and responsibilities in the workplace. Young people tell their personal experiences of being injured on the job. Family members share their stories of having lost a loved one. New workers and employers know that it takes more than a job to be ready for work. This program emphasizes the three R's of the Ready for Work program: 1. The right to know about the hazards of your job. 2. The right to participate in health and safety in the workplace. 3. The right to refuse work that you believe to be unusually dangerous to yourself and others. Viewers are encouraged to practice safe work habits on the job and understand their rights as an employee to promote safety and prevent accidents in the workplace. Suggested Use: PAA-Safety, Grades 10-12; Law, Grade 12 - Labour and Employment Law.

Dying to Work
V638 Magic Lantern Communications Ltd.
2000 19 Min. Gr. 10-12
This program is part of Saskatchewan Labour's Ready for Work series. The program examines the issue of young people being injured at work, and in some cases these injuries being fatal. In Canada, on average sixty thousand workers are injured each year and one young worker dies on the job each week. In Saskatchewan, more than 8,000 young workers are injured on the job each year. The video examines these injuries and deaths in terms of their effects on the victim and their families. The program uses experts to discuss workplace hazards, and suggests how some of these workplace accidents might have been prevented. This includes the need for tougher safety rules and greater awareness on the part of employers of their responsibilities for safety in the workplace. In addition, the experts suggest a need to create awareness on the part of young workers of the health and safety risks that exist on the job. Young workers need to know what questions to ask their employers about health and safety and how to identify workplace hazards. Suggested Use: PAA.
Duplication restricted to K-12 schools in Saskatchewan.

Ecotourism: What Is It?
V517 Classroom Video
1998 24 Min. Gr. 11
There is much debate over what constitutes ecotourism. This program examines the question in detail and focuses on three ecotourism activities. It examines what motivates ecotourists and it explores the reasons why ecotourism has grown so rapidly over the past decade. In Canada, viewers observe a group exploring some of North America's last remaining old growth forests - getting there by sea kayak. The program then moves to Mexico, where it checks on the progress of Earthwatch volunteers. The dedicated group, all from the United Kingdom, have opted for a holiday in a hot, dry environment where they conduct wildlife research. Finally, on to Heron Island, a tiny coral cay on Australia's Great Barrier Reef. This luxury resort prides itself on quality facilities within a dynamic natural environment. Suggested Use: Biology, Grade 11 - Diversity of Life, Ecological Organization.

Energy
V9273 Agency For Instructional Technology
1988 29 Min. Gr. 10-12
The demand for energy in the modern industrialized world is unprecedented, but the use of fossil fuels (coal and oil) causes pollution and depletes world resources. Nuclear power may be the best alternative, but it has a high cost, arouses widespread public opposition (especially since the accident at Three-Mile Island), and leads to the problem of disposing of radioactive waste. Government planning and action will probably be necessary to balance issues of safety, risks, economics, politics, and attitudes, and develop alternative energy sources.

Environment (Daniel Cook)
V3275 marblemedia/Sinking Ship Productions
2004 30 Min. K-1
Six-year old Daniel Cook learns to sort and identify what can go in a composter. He learns about different insects that work in compost heaps and how to start composting at home. At the Science Centre he learns what it feels like to be in a rainforest. While exploring a pond, Daniel discovers the animals and insects that live there, including snails and turtles. He visits a beehive and learns how bees use flowers to make honey. He assists the beekeeper to open up the hive, take out the panels and watch the honey ooze out. On a guided tour through a forest Daniel learns about the different plants and animals that live there. A companion interactive website and teacher's page can be found at: www.thisisdanielcook.com. Suggested Use: Kindergarten, Theme - Forests, Theme - Ponds, Theme - The Environment; Science, Grade 1 - Animals, Plants.
Duplication restricted to K-12 schools, colleges and universities only.
EXPIRY DATE: 2010-8-31
SPONSOR: SCN/Saskatchewan Learning

Fitting In (Stress)
V3501 Agency For Instructional Television
1990 15 Min. G, Gr. 6-9

Theresa, 11, lives with her father and 16 year-old sister. They have just moved, and Theresa has started at a new school. Her mother, a dancer, is away on tour; she is ignored by the housekeeper; and her father is usually absent on business. She learns that her closest friends will not be able to join her on her birthday. Her greatest pleasure is her ballet class and dancing. A friendly flower-seller tries to cheer her up, advises her to be herself, and admires her dancing. At school, she joins a group dominated by Angela, who is always ready to take risks, including smoking marijuana, which she offers to Theresa. Theresa's sister Janet says that marijuana is a poor prop for handling stress; but Tommy, Janet's boyfriend, downplays Janet's warnings. On Theresa's birthday, her father calls in to say that his flight was cancelled and that he will not be able to make it. She attends a party given by Angela whose parents are not home. Theresa is once again offered marijuana and has to decide what to do. The program ends with her decision unresolved. Suggested Use: Health Education, Grade 6 - Drug Addiction and Gambling, Grade 7 - Alcohol and Other Drugs, Grade 8 - Family Structure, Roles and Responsibilities.

Food
V9274 Agency For Instructional Technology
1988 29 Min. Gr. 10-12

Since World War II, the North American diet has come to emphasize speed and convenience of preparation, and is affected by health concerns and marketing strategies. Fast foods, freezers, and frozen foods, the increase in working women, and microwave ovens, have brought about changes in processing, packaging, and distribution. Scientists turn to genetic engineering to increase farmers' production. U.S. eating habits have an international effect, as the beef for fast food market is leading to loss of the rain forest, and freon gases in refrigerators may affect the ozone layer.
Duplication restricted to K-12 schools, colleges and universities only.

Fort Battleford - A Crossroads of Conflict, Saskatchewan
V3248 Good Earth Productions
2001 24 Min. Gr. 12
Fort Battleford witnessed one of the bloodiest and most exciting battles in early Canadian history, The Battle of Cut Knife Hill. The elements of starvation, siege, pursuit, a massacre narrowly averted, treason and hanging combined in this conflict. The North West Mounted Police were created to bring law and order to the Prairies in 1873. They built Fort Battleford (1876) at the junction of the Battle and North Saskatchewan Rivers that was the wintering place for a large number of Cree and Blackfoot Nations. Fort Battleford was known as the new capital of the North. The fort's authority was soon challenged by Poundmaker's Cree, now starving since they had been forced onto reserves and the buffalo had been hunted to extinction. Suggested Use: History, Grade 12 - The Nineteenth Century: The Road to Democracy.
Duplication restricted to K-12 schools, colleges and universities only.

Fortress of Louisbourg, Nova Scotia: Phoenix of the New World
V6708 Good Earth Productions
1998 24 Min. Gr. 10-12
In the 1700's Louisbourg was one of the main mercantile shipment points between Europe and the New World. Twelve hundred civilians lived comfortably and prospered within the stone walls of the fortification under the watchful eyes of the 500 French soldiers garrisoned there. The Louisbourg fortification was completed in 1745, on the eve of the first siege by the English. Today, Louisbourg is a world class historical restoration on the tip of Cape Breton Island. In their hasty departure, the French left millions of documents and artifacts behind, effectively creating the blueprints for a detailed reconstruction of the original site. Suggested Use: History, Grade 12 - The People and the Land; Social Studies, Grade 12 - Change.
Duplication restricted to K-12 schools, colleges and universities only.

Fred Cogswell
V2295 Canadian Council Of Ministers
1984 15 Min. Gr. 10-12
Cogswell talks about his early attempt to write poetry and his adolescence. After reading 'Circular Saw' he tells us he wrote it from a memory of an incident that happened in 1939. He explains why he believes form is always subordinate to subject matter or content. We next see Cogswell with a student to whom he is explaining the structure to writing poetry and what a beginning writer should first try to express. Back in his home he reads 'The Rock Pile' and 'The Butterfly'. He discusses his most recent volume of poetry 'Pearls' and 'How It Was', written after the death of his daughter Carmen. He discusses his creative process when writing, reads 'New Brunswick' and gives his thoughts on how he sees himself as a writer. The program ends with Cogswell reading 'When Time Has Closed My Coffin Lid'.

Fresh Waters Flowing: Biological Monitoring Protocol
V3281 The Video Project
2002 37 Min. Gr. 10-12
Fresh Waters Flowing, Part 1, explores the connection between humans and rivers and the links between human influences and the ability of a river to support healthy living communities. This beautifully filmed program featuring James Carr of the University of Washington and Charley Dewberry of Pacific Rivers Council, reveals the importance of a river's biological integrity and demonstrates how measuring biological condition with the index of biological integrity (IBI) can be a powerful tool for maintaining and restoring healthy watersheds. Biological Monitoring Protocol, Part 2, introduces IBI as the best yardstick for measuring the health of rivers and streams. Measuring pollutants such as temperature, phosphorus, or toxic chemicals may tell if a river is clean, but only a direct biological yardstick like IBI will tell you if a river is healthy. IBI has been adopted to monitor rivers on all continents except Antarctica. It can be used to tell how well a stream can support wild salmon. The program outlines the actual equipment and techniques needed to collect data to use IBI. Viewers have a better understanding of the interrelationship between underwater insects, fish, and people. Suggested Use: Science, Grade 10 - Sustainability of Ecosystems; Biology, Grade 11- Diversity of Life, Grade 12 - Ecological Organizations.
Duplication is restricted to K-12 schools, colleges and universities only.

A Friend Indeed (Responsibility)
V3507 Agency For Instructional Technology
1990 16 Min. G, Gr. 6-9
J.D.'s friend Brad wants to drink all the time and even persuades J.D. to drink some whiskey with him. When Brad passes out on a trestle, J.D. is worried enough to try to get help from an alcohol hotline. Following the counsellor's advice, he tries to tell Brad how concerned he is, but Brad rejects him and drinks even more, making himself sick at a movie. At school, the boys' teacher introduces a high school student who represents the early intervention program. She tells the class about her experiences as an alcoholic and her recovery. Following the presentation, J.D. tells his mother about Brad's problems and admits that he drank with his friend once. His mother is outraged and calls Brad's father, who punishes Brad. As a result, Brad rejects J.D. entirely and alienates Tony, another friend of J.D. Eventually, Brad's drinking gets him in serious trouble during a fight, and Tony asks J.D. where they can get help. They turn to their teacher, who says that the early intervention program can help Brad. Suggested Use: Health Education, Grade 6 - Drug Addictions and Gambling, Grade 7 - Alcohol and Other Drugs.

Gambling: Reducing the Risks
V2951 Minnesota Institute of Health
1998 9 Min. Gr. 6-9
Gambling: Reducing the Risks video series accompanies the grade 6-9 gambling teaching resource that has been distributed to schools across Saskatchewan. The video is comprised of three short vignettes designed to help viewers make informed choices about whether, when and how much to gamble and where to call to get help for a gambling problem. The vignettes are open-ended situations. This format allows teachers to engage students in follow up discussion about gambling and how to choose options that lead to healthy lifestyle choices. The Card Game depicts four friends who have played poker, gambling nickels and dimes once a week for 5 years. One of the boys will be turning 18 in a couple of days and he is heading to the casino. He asks his friends to join in on the fun. The Disappointment - Two friends have made plans to go to a basketball game. The mother of one of the girls calls to tell her daughter that she has to stay home to babysit her younger brother. The mother is out gambling, again. The Pawn Shop - In order to get money to gamble, a boy pawns a diamond ring. The pawn shop owner asks if the ring is "hot". The diamond ring is not the first possession that the boy has pawned. For a complete copy of the accompanying print material Gambling: Reducing the Risks, please contact 787-2056.

Genetic Engineering
V9277 Agency For Instructional Technology
1988 29 Min. Gr. 10-12
Manipulating the genetic code in plants and animals may lead to a revolutionary breakthrough in the technology of food production - developing cows with greatly increased milk production, plants that resist frost damage, and large quantities of other foods. If such genetic manipulation becomes common, some experts worry about the loss of biological diversity, cruelty to animals, economic disruption of the dairy and other markets, and the possibility of unforeseen, disastrous effects.

Geometry
V637 National Council of Teachers of Mathematics
2000 15 Min. Gr. K-2
The Monsters create a model of their town and call it Mini-Monster Land. To create an accurate model they need to take a good look at the different shapes and sizes of neighbourhood buildings. At first they go to the roof of their castle for an overview and they wonder why buildings so far away are so tiny. The Monsters explore concepts of persepective and then visit the town to see buildings up close. They encounter a triangular prism, cube, cylinder, and octagonal prism and discover information about the characteristics of these shapes. They visit an architect who shows them his process for drawing, computerizing and modeling his new constructions. Suggested Use: Mathematics, Grades K- 2.

George Bowering
V2277 Canadian Council of Ministers
1984 15 Min. Gr. 10-12
George Bowering talks humorously about what the student may have to look out for when reading 'A Poem for High School Anthologies'. He describes a 'writing' day, tells of his formative years before becoming a writer and reads 'The Brush Fire'. He explains why he changed from writing on a typewriter to using a pen. He reads 'Baseball', talks about how he tries 'not to shame the language' and describes his writing routine between the typewriter and the computer. He humorously explains why his poems don't rhyme any more, reads 'The Flying Dream' and takes us to the house in Vancouver where poets met in the late fifties and early sixties. He reads 'Desert Elm Grandfather' and ends the program gently giving advice to aspiring poets.

A Good Deal for Saskatchewan
V1238 Saskatchewan Labour
2001 11 Min. Gr. 10-12
This video and guide are part of Saskatchewan Labour's Ready for Work resource series. Senior high teachers and post-secondary instructors who are preparing their students for the workforce will find this video resource informative and useful. Young people need to know their rights as well as their responsibilities for fair and equitable workplaces. This video resource examines The Labour Standards Act and the role it plays in helping to maintain and promote fair workplace practices in Saskatchewan. This Act sets the minimum standards in Saskatchewan workplaces for overtime, work schedules, meal breaks, minimum wage, holiday pay and terminating employees. It is important to young people as it defines the workplace practices under which many of them will work (or employ others) as they enter the workforce for the first time.

Good Practice Today (Refusal Skills)
V3504 Agency for Instructional Technology
1990 15 Min. G, Gr. 6-9
After Jeff has missed a baseball practice, his friend Darren arrives, very upset, telling him that some of the other boys are dipping snuff. In fact, they put so much pressure on Darren after the practice - arguing with him, calling him "baby" and "chicken" - that he gave in and tried some, although he knew it was dangerous and did not want any. He dreads the next practice, and Jeff, too, becomes very worried about his ability to withstand the pressure. He confides in his sister Sherri, who persuades him to role play the situation in which his friends "get on his case" to try snuff so that he can try out different responses. Sherri puts him through a tough practice. Afterward, he persuades Darren and Steve, another teammate, to join him in practising ways to refuse snuff. After the next baseball practice, they face their teammates with confidence. A Great Dream: The Charlottetown Conference
V442 Parks Canada
1999 19 Min. Gr. 12
Province House (a National Historic Site administered by Parks Canada) was the setting for a meeting of great historical significance that would shape a vast country into a nation. It was here, in September 1864, that delegates from the three Maritime colonies and the colonies of Upper and Lower Canada (Ontario and Quebec) would meet, get to know each other, and share their visions of a future union. Filmed on location at Province House National Historic Site, dramatized scenes depict the amicable atmosphere of this historic conference, the individuals who played key roles and the grandeur of the building that played host to the event. Narration by renowned historian, Laurier Lapierre, O.C., enhances the significance of this initial meeting. Canada was born out of simple beginnings - a common dream shared by a few men of vision. Their coming together in Charlottetown, Prince Edward Island set the stage for a future confederation of an immense land that would become one of the most admired countries in the world. This dramatization of the September 1864 meeting at Province House National Historic Site captures the spirit of the conference, the circumstances leading up to the event and the array of personalities involved in turning a dream into reality. Suggested Use: History, Grade 12-The Nineteenth Century: Road to Democracy; Social Studies, Grade 12-Change.

Great Master of the Beaver House: Richard Hardisty (1839)
V77 Alta Dept of Education A/V Dpt
1976 15 Min. Gr. 1-9
One of the last great chief factors of Fort Edmonton, nicknamed Red Head, Great Master of the Beaver House, is shown in the early 1800's when Chief Crowfoot of the Blackfoot tribe visits him. The Chief has had a dream that only a white man with red hair can save him from his illness. Although Hardisty does what he can for Crowfoot, he fears for the Chief's life and that he may be blamed if Crowfoot dies. But Crowfoot recovers and makes Hardisty a blood brother in gratitude, promising that brother never rises against brother. 'The Dream That Helped Keep the Peace' is so called because Crowfoot held back his warriors from joining in Louis Riel's rebellion in 1885 because of his promise to Hardisty.

On a hike through Gros Morne National Park the unusual geology and rich biodiversity of the area, including many moose, is found. The unique rocks have contributed to the world's understanding of plate tectonics and the park has been declared a UNESCO World Heritage Site. A young conservationist from Deer Lake explores the Bay of Islands. Jay explains why Newfoundland's West Coast is a geologist's dream due to the upheaval of the earth millions of years ago and explains why most of the population is on the East Coast. Jay explains how organic matter is constantly recycled through composting. Suggested Use: Social Studies: Grade 5 - Unit 1; Unit 2; Unit 3; Science, Grades 4-7.
Duplication restricted to K-12 schools, colleges and universities only.

Grosse Île Quarantine Station, Quebec: Harbour of Tears
V6700 Good Earth Productions
1998 24 Min. Gr. 8, 10-12
There are thousands of stories that should be told about Grosse Île. Its history began in the 1830s, when it became a quarantine station to accommodate the first immigrants to Canada. It is best known as a tragic memorial, because of the 5500 Irish who died here of "ship fevers" at the time of the potato famine. But Grosse Île is also the story of the birth of modern public health. Innovations were created here that would help stop the spread of deadly 19th century diseases. This island is also the legacy of Canada's early attitudes to immigration, and the compassion with which the people who died here were treated. Suggested Use: Social Studies, Grade 8 -9; Culture; Identity; History, Grade 12 - External Forces and Domestic Realities; Social Studies, Grade 12 - Culture.
Duplication restricted to K-12 schools, colleges and universities only.

Groundwater
V9276 Agency For Instructional Technology
1988 29 Min. Gr.10-12
We need water for every human activity, but our aquifers are in danger. We use far more than can be replenished by the natural process of recharge, and many people have found their wells or other sources of water contaminated by industrial or agricultural runoffs or landfills. The federal government regards water quality as a state or local concern, but water in the lowest aquifer can travel long distances. Technology is developing ways of sealing landfills and testing water, but cleaning up contaminated aquifers is expensive and not totally reliable.

The Gulf Islands, B. C.: Island Hopping
V999 Summerhill Entertainment Inc.
2001 25 Min. Gr. 5
The Gulf Islands are a grouping of over two hundred islands situated between the BC mainland and Vancouver Island. During their visit to Salt Spring Island they see the Krieger family and meet two llamas, go sea-kayaking and see how llama wool is spun into yarn. On Gabriola Island they visit Bob Wyche, the head instructor at the Silva Bay Ship Building School where they build wooden boats using traditional methods and local wood. They enjoy a sail on the family boat to see the island's sandstone cliffs. A biologist and diver, Brian Nichols, takes them by boat to see some of the 3,000 species of animal and plant life that populate this area, the Georgia Strait. They also learn that the Gulf Islands are the tips of mountains formed millions of years ago. Plate Tectonics causes the plates of the Earth's crust to move continually resulting in the relocating of the continents again and again over millions of years. Suggested Use: Social Studies, Grade 5 - Unit 1; Science, Grades 4-7.

Guts and Glory
V594 Minds Eye Pictures
2000 23 Min. Gr. 6-8
Theme: Overcoming your fears. To Be a Fly or to Fly (Fantasy/Comedy). Child Author: Angela Ma, age 13 (Vancouver, BC) - Cynthia is a young witch who is not looking forward to her 13th birthday. If she doesn't learn to fly by the stroke of midnight on her birthday, the results will be disastrous! In a desperate attempt to gain flight, Cynthia accidentally turns her grandmother into a fly. Cynthia's quest to return grandma to human form teaches her about what really matters in life. The Curse of the PJ's (Comedy). Child Author: Céline Niezgoda, age 13 (Tomblaine, France) - Estelle seeks the help of a French circus magician to overcome her shyness. Instead of helping, he makes her the centre of attention by cursing her with permanent pyjamas! Unable to convince her teachers of her misfortune, they force Estelle to explain her disobedience in front of the entire school. Little does Estelle realize that her PJ's are a first step in a life lesson about self-confidence. Suggested Use: English Language Arts, Grades 6-8.

Gwendolyn MacEwen
V2286 Canadian Council Of Ministers
1984 15 Min. Gr. 10-12
Poet Gwendolyn MacEwen recalls an early interest in poetry as a child in Toronto. The desire to write was so strong that she felt university would be a needless interruption in the development of her poetic skills. Accordingly, soon after leaving high school, she began to travel widely and record her impressions in verse. During a journey to the Middle East she acquired an intense interest in Lawrence of Arabia. One of the results of that interest is the collection of writings titled the 'T.E. Lawrence Poems'. During the program MacEwen reads from that volume 'The Desert', 'Solar Wind', 'Water' and 'Boanerges'.

Head Smashed-In Buffalo Jump, Alberta
V6698 Good Earth Productions
1998 24 Min. Gr. 5-9
At Head-Smashed-In, the Blackfoot people share thousands of years of cultural heritage with the rest of the world. For the Blackfoot people, the buffalo was a vital component in sustaining life. Virtually every part of the animal served a function; providing food, clothing, shelter, utensils and tools. A successful hunt could mean the difference between life and death. To assure victory, the hunters devised a complex system of herding buffalo to a pre-destined place where they would be tricked into stampeding over a cliff. Developed more than eight thousand years ago, the "buffalo jump" was still in use as recently as the 1870's. Head Smashed-In Buffalo Jump, in southern Alberta, is the largest, oldest and best preserved example in the world. Suggested Use: Social Studies, Grade 9; Culture; History Grade 12 - The People and the Land; Native Studies, Grade 12 - Economic Development; Social Studies, Grade 12 - Change; Social Studies, Grade 12 - Culture.

Health Service and Outcome Indicators: Planning Tools
V896 Saskatchewan Health
2001 485 Min. G
This workshop was originally produced as a distance education program through the facilities of the Audio-Visual Division of the University of Regina and the Saskatchewan Communications Network (SCN) on November 19, 2001. The program was sponsored by Saskatchewan Health and moderated by Dr. Ralph Nilson, University of Regina. The purpose of the event was to assist health system managers, their partners, researchers and policy consultants to integrate health service and outcome indicators into organizational strategic planning, policy development, and goal-setting processes. Dr. Geoff Anderson, Senior Adjunct Scientist for Institute for Clinical Evaluative Studies and a professor with the Faculty of Medicine at the University of Toronto, was the keynote speaker. His work focuses on the analysis of performance data for a variety of health services aimed at maintaining the quality of Ontario's health-care system.

How the Fiddle Flows
V3283 National Film Board of Canada
2002 48 Min. Gr. 9-12
This program follows Canada's great rivers west along the fur-trading route of the early Europeans. The newcomers introduced the fiddle to the Aboriginal people they intermarried with along the way. A generation later, their mixed-blood descendants blended European folk tunes with First Nations rhythms to create a rich and distinct musical tradition. From the Gaspé Peninsula, north to Hudson Bay and the Prairies, this program reveals how a distinctive Métis identity and culture were shaped over the years. Viewers will see performances by some of Canada's best known fiddlers and stepdancers. The program, set in Saskatchewan, is narrated by Tantoo Cardinal. While this program is recommended for use at the secondary level, excerpts would be appropriate for use at any grade. Suggested Use: Arts Education, Grades 10-12 - Dance, Music; History, Grade 12 - Relationships: Peoples and Paradigms; Native Studies, Grades 11-12.
Duplication restricted to K-12 schools, colleges and universities only.

I Think I Am (Self Concept)
V3500 Agency for Instructional Technology
1990 15 Min. G, Gr. 6-9
Twelve year-old Diane wakes up saying that she feels worthless. Ten year-old Rod scoots from refrigerator to counter in his wheelchair as he makes his special pancakes for his family. Getting to school, in math and movement classes, on the playground, and in class discussion, Rod cheerfully participates, expressing his pleasure at being part of a group that solves problems and offers mutual encouragement. In each situation, however, Diane speaks of her certainty that no one likes her, that she will always be wrong, and that no one wants to hear what she says. Her friends, who hear her unhappy talk, express concern. She invites them to attend an after-school meeting of the "Drug Free Club". There she, Rod, and other members run through a skit they have written about "how the way you feel about yourself can make a big difference in the chances you will use drugs". Rod, whose part calls for the positive statements he has been practising all day, can say "no" to an offer of drugs. Diane, whose part calls for the lines expressing poor self-concept that she has been rehearsing all day, asks for some. Suggested Use: Health Education, Grade 6 - Drug Addictions and Gambling, Self-concept, Grade 7 - Alcohol and Other Drugs.

Integrative Education: Curriculum for the Future
V1611 SaskMedia
1982 55 Min. A
'The higher cortical function, the challenge of cognitive thought, the excitement of really working with the mind brain and finally incorporating all of that imagery and intuition and insight from the pre-frontal lobe - that is integrative function'. Noted researcher Dr. Barbara Clark, discusses recent brain research which has shown that intelligence, far from being given at birth, is something which can grow and increase throughout one's lifetime. She addresses the biological differences between average learners and gifted learners and challenges educators to 'take what we're learning from the brain researchers and put it to work in the classroom now' for, according to Dr. Clark, every child has the potential to develop into a gifted learner.

Issues, Challenges and Benefits, Video Two
V6643 Saskatchewan Health
1998 81 Min. Adult
This three-video series will be of interest to employees, employers and groups who provide support to organizations in the area of workplace health, such as employee assistance program providers, occupational health and safety professionals, recreation and fitness professionals, human resource professionals and other service providers. It will be useful to management and staff of district health boards, government departments and Crown Corporations. The series, originally produced on March 4, 1998 as a distance education program, was sponsored by Saskatchewan Health in co-operation with the Workplace Health Advisory Committee and Health Canada. In Video Two "Plays for Living", a drama group performs three vignettes that portray issues facing workers today. A panel shares their perspectives on issues in Saskatchewan workplaces and discusses challenges and benefits for organizations that develop workplace wellness programs. Panel members are Lynda Robson, Institute for Work and Health; Don Stevenson, Saskatchewan Public Service Commission; Terrence Dalton, Health Canada; Judith Martin, Balancing Work and Family Initiative; and Eldeen Pozniak, Saskatoon Health District.

Keeping the Family Well - 3
V8258 Cable Regina
1992 41 Min. A
Families in stress need to learn how to have positive regard for each other. They need to separate the bad behaviour from the person and to look for the positive. To learn how to praise each other Dr. Stinnett and Defrain suggest that for every negative thing the families look for four positive. Most importantly, families need to learn how to have fun together.

Kids of Today - Developing Resiliency
V17 Media Group
1997 41 Min. Adult
This video and print program, designed by teachers and health professionals, is an in-service package for individuals who wish to do prevention activities with youth. It provides a theory and a framework for giving students a comprehensive and healthy "sense of self". Achievement of such a sense may assist greatly in the prevention of a variety of harmful behaviours. The program describes a model of concentric circles by which one may visualize how one's sense of self extends from the centre (me) outward from the most personal to the societal. Kids of Today is based on the work of Ms. Sandy Friedman of Vancouver, B.C. It has been adapted for use in Saskatchewan and expanded for use with boys as well as girls. The accompanying print materials are available through calling 787-2056 and asking for Saskatchewan Health's "Kids of Today".

Lacrosse: The Creator's Game
V547 Magic Lantern Communications
1994 26 Min. Gr. 6-12
This program is a documentary on lacrosse, the oldest organized team sport in North America, played by native peoples before Columbus came to America. It explores the history of lacrosse and its spiritual significance to Canadian aboriginals, their generosity in sharing lacrosse with non-natives, and the period during which they were excluded from playing lacrosse on the professional circuit. Interviews with modern lacrosse players and native leaders are interwoven with archival footage and photographs of the native teams that played in England for Queen Victoria. It features the Powless family, a Mohawk family renowned in the world of lacrosse, and Jay Silverheels, who played Tonto on the Lone Ranger. "Silverheels" gained his nickname from his prowess as a star on the lacrosse field.
Suggested Use: Native Studies, Grades 10-11; Physical Education, Grades 6-9 - Developmental Games and Sports.
Duplication restricted to K-12 schools, colleges and universities only.
EXPIRY DATE: 2006-8-31

Learning Essential Skills (Essential Elements)
V8237 Agency for Instructional Technology
1992 19 Min. A
Faculty and staff at highly effective schools work together to emphasize mastery for all students. Ample and efficient time for learning is given high priority, and teachers make sure that little time is wasted in giving assignments, starting classes, or making transitions between activities. While this "no nonsense" approach does not guarantee high achievement, it is a prerequisite to effective teaching and learning. At these schools, teachers emphasize the mastery of academic content by avoiding "social" promotions and developing curricula structured so that students must master each step before proceeding.

Like You, Dad (Wellness)
V3508 Agency For Instructional Technology
1990 16 Min. G, Gr. 6-9
Thirteen year-old Carol and eleven year-old Amy attend a health fair at school with their parents and brother. Their father, Jack, takes a health test that shows that his smoking, lack of exercise, and eating habits have affected his blood pressure and pulse rate. His wife and his daughters are concerned and conspire to plan a camping vacation for the family, hoping that exercise and limited junk food will help his health. Jack struggles to keep up on the first day's hike, and then decides to sit out the next one, along with nine year-old Richard, who idolizes his father. As they lounge in front of the tent watching a portable TV, Richard decides to go to the camp store to get more snack food. He finds his father's cigarettes and tries one. Jack finds him and gets angry but realizes that his own example is influencing his son. When the family packs up to leave the campground, Jack suggests coming again next year. He then drops his cigarette carton in the trash. Suggested Use: Health Education, Grade 6 - Drug Addictions and Gambling, Grade 7 - Alcohol and Other Drugs, Grade 8 - Family Structures, Roles, and Responsibilities.

1993 24 Min. A, Gr. 2-5
Cette video de 25 minutes resume les objectifs et les modes d'intervention du programme ECOUTE TON COEUR. Des temoignages d'enseignants et des sequences montrant les eleves de trois differents niveux pendant les discussions et les activites en classe temoignent de la simplicite et de l'enthousiasme qui entourent le programme. La video de presentation introduit les participants au coeur meme du programme ECOUTE TON COEUR; elle donne, en quelque sorte, un avant-gout de ce qui va suivre dans la troisieme partie du Guide de formation.

Management and Treatment of Youth With Significant Behaviour Disorders in Various Settings - Pt.1
V6629 Saskatchewan Health
1997 86 Min. Adult
Dr. Jalal Shamsie, noted psychiatrist, presents information on behaviour problems in youth, which are "troublesome" to those around them. Such behaviour disorders, not often diagnosed as either Attention Deficit Hyperactive Disorder (ADHD), Oppositional Defiant Disorder, or Conduct Disorder, are described in terms of the causes, the characteristics of behavioural manifestations of the disorder and effective treatment utilizing family and community supports. A brief question and answer period follows the first session with Dr. Shamsie and members of a panel of Saskatchewan experts answering questions from across the province.

Many Happy Returns
V251 International Instructional Television Co-op
1977 14 Min. Gr. 1-5
The program introduces the concept that individuals change physically as they grow older. The program shows that each age has its own stages of development, for example muscular development and such things as dental development in the very young. It also stresses that while bodily functions might slow down in old age, people can do a great deal to ensure the continuation of activity and ability into old age if they take the right precautions.

Mapping
V621 National Council of Teachers of Mathematics
2000 15 Min. Gr. K-2
The Monsters have sent out invitations to a party. One of their guests, Binary Bill, has no idea how to get to their castle from his computer shop. Multiplex draws a free form map with just a curving line and sends it to him by email. When Binary asks for landmarks, Multiplex quickly adds a few things that can be seen on route but he doesn't draw them in the right order. This leads to confusion and a further refining of the map. Ultimately the Monsters leave the castle and go on site to label all the streets in their neighbourhood and Mina flies up above Monster Land to compare the map to the actual territory. On a field visit to a school bus driver they learn how he works with maps on his travels to pick up children. Suggested Use: Mathematics, Grades K - 2.
Duplication restricted to K-12 schools, colleges and universities only.

Mapping Canada: From Astrolabes to Lasers
V2622 Charbonneau Productions
1986 18 Min. Gr. 6-9
The character of Champlain is used to explore changes in mapping tools since the use of the astrolabe in the 1600's. The concept of scale is discussed. Some history of cartography and surveying in Canada is also presented. The purpose of surveying and the types of information that surveyors discover are shown. The use of lasers, computers and satellites in modern surveying is discussed to explain how maps are produced from the data. Good Canadian content.

Mara's Breathtaking Story
V6628 Kinetic Inc.
1994 22 Min. Gr. 6-9
Mara's cool new friends share everything, including cigarettes. Smoking to them is a right, a badge of independence and a mark of sophistication. Both Mara's mother and grandma are heavy smokers. Everything indicates that Mara is on her way to a lifelong addiction until dramatic circumstances force her to re-evaluate her choices. This video identifies the forces that lead to tobacco use and addiction. It dramatizes the consequences of addiction and more positively, demonstrates the value of quitting. Viewers will learn that smoking contributes to serious diseases such as cancer, heart disease and emphysema, that second hand smoke is a serious public health issue, creating risks for those who don't smoke and that tobacco manufacturers manipulate their audience by portraying smoking as sexy or macho. Suggested Use: Health Education, Grade 9 - Tobacco Industry.

Michel Tremblay
V2289 Canadian Council of Ministers
1984 15 Min. Gr. 10-12
A dramatized section of Quebec playwright Michel Tremblay's piece 'Les Belles Soeurs'. Tremblay explains, had its beginnings during World War II, when there were few men at home. As a child he was able to observe the tensions and delights that flourished in a household of seven women. Later he combined that experience with two interests - the living language joule and the methods of Greek tragedy - to present a tragic-common view of life in Montreal's east end.
Duplication restricted to K-12 schools, colleges and universities only.

Mickey Mouse Monopoly: Disney, Childhood and Corporate Power
V3096 Media Education Foundation
2001 52 Min. Gr. 10-11
This provocative program attempts to deconstruct the 'Mickey Mouse monopoly'. It examines the power of Disney and its influence on global culture. Under the guise of innocence and fun, its films and related projects construct and shape stereotypical views of race, gender and class. Interviews with cultural critics, media scholars, child psychologists, kindergarten teachers, multicultural educators, college students and children will provoke viewers to examine comfortable assumptions regarding an institution they have known since childhood. Suggested Use: Social Studies, Grade 11- Unit 1, Unit 4; History, Grade 11 - Unit 5; Psychology, Grade 11 - Making Sense of Our World; English Language Arts: Grade 10 - Media Studies, Grade 11.
Duplication restricted to K-12 schools, colleges and universities only.

Military: Canadian Forces
V6852 Third Wave Communications
1999 24 Min. Gr. 6-9
This program is about creating a challenging and rewarding career in Canada's military. Not many people realize that, with approximately 90,000 personnel, the Canadian Forces is the second largest employer in Canada! Currently, 60,000 regular force personnel and 30,000 reserve members make up our military force. In addition, there are 18,000 civilian personnel employed in the Department of National Defense. While the military's role is to defend Canada, contribute to world peace, and protect our country's interests abroad, it also provides valuable assistance during national emergencies such as the Manitoba floods and ice storm 98. With so many varied and exciting roles to fulfill, the Canadian Forces offers a wealth of opportunity. Three women doing just that include a Naval Combat Information Operator, an Army Infantry Soldier and an Airforce Reserve Electrical Distribution Technician. Suggested Use: Career Guidance, Grades 6-9 - Career Awareness, Exploration and Planning.
Duplication restricted to K-12 schools, colleges and universities only.

Milton Acorn
V2297 Canadian Council of Ministers
1984 15 Min. Gr. 10-12
Milton Acorn is seen at home in Prince Edward Island. The camera follows him along the endless beaches where he goes for inspiration. He is seen ambling along the streets of Charlottetown where he is a familiar, even curious figure as he pauses to record his thoughts in his ever present journal. We hear three of his best known poems - 'I Milton Acorn', 'I've Tasted My Blood, 'What I Know Of God'. Milton Acorn discusses his life and his work. He explains his attitude towards poetry and its importance to literature. He also talks about the highlights of his career - the People's Poet Award; the Governor General's Award; a Doctor of Laws Degree from the University of Prince Edward Island.

Miramichi, New Brunswick: The Mystery of the Miramichi
V980 Summerhill Entertainment Inc.
2001 25 Min. Gr. 5
Jamie and Jennifer explore the Miramichi region of central New Brunswick that is renowned for its extensive river system, thick forests and annual salmon run. An eleven-year-old provides an enjoyable lesson in canoeing for the hosts. They canoe down the river to discover the region's First Nation's history by visiting the oldest New Brunswick community of Red Bank. Local members of the Mikmaq First Nation talk about how the natural resources of the area have attracted their people for over 2400 years. They try fly-fishing. This area is North America's premier Atlantic salmon ground. They also learn how archaeological digs tell a lot about Canada's ancestors. Suggested Use: Social Studies, Grade 5 - Unit 1; Science, Grades 4-7.

Multiplication With Fractions and Mixed Numbers
V2578 Agency for Instructional Technology
1987 15 Min. Gr. 1-9
On a treasure hunt with clues that involve fractions, members of a children's club meet a friend who will help in return for one/fifth of the booty. They learn that to multiply mixed numbers, they must put all numbers into fractional form. Graphics show why the product of fractions is smaller than the number multiplied.

My Community - Part I (Daniel Cook)
V3268 marblemedia/Sinking Ship Productions
2004 30 Min. Gr. K-2
Six-year old Daniel Cook explores the world around him through his own candid questions. In this episode Daniel tours a police station and learns about the different vehicles that police officers use to help the community. At the Fire Station, Daniel learns about the different tools that firefighters use to fight fires and suits up in a firefighter's outfit. Daniel tours a local market to see and taste all the different things a market has to offer. He learns how sidewalks are built while visiting a construction site. At a historic train station Daniel learns how to control big electric trains. A companion interactive website and teacher's page can be found at: www.thisisdanielcook.com. My Name Is York
V3213 Agency for Instructional Technology
1999 12 Min. Gr. K-7
Elizabeth Van Steenwyck has written about the only African member of the Lewis and Clark expedition that set out on May 22, 1804 to find a water route to the western coast of the North American continent. The story of this adventure is told through York, Captain William Clark's slave and lifelong companion. While it is a quest for scientific knowledge and a safe navigable waterway for commerce, the author depicts York's search as one for a glimpse of freedom. Suggested Use: English Language Arts, Grades K-7.

The Night Watch
V3291 BBC Enterprises
2004 50 Min. Gr. 10-12
One of the world's greatest group portraits is The Night Watch, Rembrandt's painting of a group of part-time soldiers setting out on parade. In Holland, it has the status of a national symbol. Viewers learn about the painting from its conception in 1642 to its position today as the supreme painting in the Rijksmuseum, Amsterdam. Militiamen had the job of maintaining law and order on the streets of Amsterdam, but by the time of The Night Watch, the job had become largely ceremonial. A group of militiamen, the Kloveniers, commissioned Rembrandt to do a collective portrait. Rembrandt produced an extraordinary picture full of movement and life. Through the work of experts and the results of X-rays, viewers see in great detail how the artist achieved his masterpiece. Suggested Use: Arts Education, Grade 10-12 - Visual Art.

Number Conservation, Transformation and Equivalency
V616 National Council of Teachers of Mathematics
2000 15 Min. Gr. K-2
The Monsters decide to plant two gardens, each with the identical number of monster melon plants. When the seeds are delivered the Monsters are out collecting gardening tools. Aunt Tulips delivered two piles, each containing the same number of seeds but one pile is stacked high, while the other is spread out. The Monsters argue about which pile has more seeds and then they proceed to develop strategies to discover the truth. This provides an opportunity to explore number conservation and one to one correspondence. On the field trip to a bakery they find out how a batch of dough that creates six rolls can actually be the same size as a batch that creates only one loaf of bread. Suggested Use: Mathematics, Grades K-2.

Old Fort William, Ontario: The Front Line of the Fur Trade War
V6858 Good Earth Productions
1999 24 Min. Gr. 5, 12
Fort William was built a thousand miles from civilization. It was the key to the fur trapping industry satisfying the fashion whims of high society in London and Paris. The Europeans were snapping up beaver pelts at exorbitant prices to be used in their new headgear of choice, the top hat. The new North West Company sensed quick riches and carved out an overland route linking the western trapping grounds to the shipping fleets in Montreal. Fort William served as the halfway transfer point so the Voyageur canoe teams could beat the big freeze-up of lakes and rivers. The fort enabled the Nor'Westers to capture 78 percent of all fur sales and it served as inland headquarters for the North West Company. The rich bounty enjoyed by the company and its new fort soon caught the eye of their arch rival, the Hudson Bay Company. Hostility between the two companies soon broke wide open into the Fur War and Fort William was on the front line. Hudson Bay director Lord Selkirk surrounded the fort in 1816 with his Swiss mercenary soldiers. The North West Company directors surrendered without a shot being fired. They took their chances in court and lost. A ruined North West Company had to merge with Hudson Bay. That spelled the end of Fort William and by 1863 it closed for good. The fort had served as the anchor to a chain of trading posts which staked Canada's claim to the 49th Parallel as its border with the American colonies. Its contribution was not forgotten. In 1971, the fort was reconstructed in precise detail with 43 buildings spread over a 25-acre site. It is one of the largest historical reconstructions in North America.

Panel Presentations - Video Three
V6649 Saskatchewan Health
1998 51 Min. Adult
This three video series will be of interest to all professionals, community workers and volunteers who work with children, youth and their families. It will also be useful to district health board staff, policy makers, community representatives and staff from the education, social services, justice and municipal government sectors. The series, originally produced on February 18, 1998, as a distance education program through the facilities of the Audio-Visual Division of the University of Saskatchewan and the Saskatchewan Communications Network (SCN) was sponsored by Saskatchewan Health. Donna Benesh and Dennis Chubb, Co-ordinators for the Regina and Saskatoon Regional Intersectoral Committees moderated the workshop. In Video Three, panel presentations describe first hand accounts of youth initiatives from across the province and note the advantages and strategies of youth and adults working together. Panel Presentations: Edmee Korsber, Living Sky Health District and Alison Solmes, Member, Youth Advisory Committee provide an overview of the Living Sky Health District Youth Advisory Committee video project "It Starts With Us". Don Favel, Board Member, Ile-a-la-Crosse Friendship Centre outlines the Ile-a-la-Crosse Youth Outdoor Wellness Conference. Michael LeClaire, Principal, Nutana Collegiate Institute in Saskatoon, presents an overview of issues identified by youth regarding barriers to staying in school and learning. Amanda Thomas, Student, Nutana Collegiate Institute discusses some of her experiences and gives a youth perspective of the Nutana Program.

Parent Involvement (Essential Elements)
V8233 Agency for Instructional Technology
1992 18 Min. A
Effective schools reflect the findings of research that a high level of parental involvement in their children's education enhances student chances for success. Parents can be a driving force in bringing about change in schools. Involvement alone, however, is not as important as the nature of the involvement. It must be focused toward the goals of the school and the students' achievements.

Parents and Schools (St. Louis, Missouri)
V3511 Agency for Instructional Technology
1990 31 Min. G, Gr. 6-9
This program demonstrates how the school system, police department and community agencies of urban St. Louis implemented a number of innovative programs designed to build connections between families and schools. Their goal was to bring these groups together to create an environment that would help children stay free of drugs. The programs address high-risk, inner-city family problems that frequently underlie the causes of drug abuse and the breakdown of families that so often accompanies it. Suggested Use: Health Education, Grade 6 - Drug Addiction and Gambling, Grade 7 - Alcohol and Other Drugs, Grade 8 - Family Structure, Roles and Responsibilities, Teacher Reference.

Penalty Kick (Risk Factor)
V3499 Agency for Instructional Technology
1990 15 Min. G, Gr. 6-9
Eleven year-old Eric, a hemophiliac, enjoys riding his bike recklessly and taking other physical risks, although his mother, an alcoholic who is out of work, cannot afford doctor's bills or repairs to his bike. Eric's friend George is under great pressure from his father to excel in soccer. George has heard his father say that alcohol "relaxes" him, so he carries vodka in a jar to sip when pressure becomes great. Eric and his friend Philip at first turn down George's invitation to share the vodka, but then Eric hurts his arm during a bad fall from his bike. George plans to miss school to have more time to practice before soccer tryouts. Dreading remarks from classmates about his bandaged arm, Eric joins him. At the tryouts, the coach tells the boys that their parents had been called about their absenteeism. He laments that he would like to have George on the team, but he cannot take someone who plays hooky. Knowing his father will be furious, George pulls out his supply of vodka. Eric, knowing how angry his mother will be, is tempted to join him. The program's conclusion is open-ended. Penguins Behind Bars
V3288 National Film Board of Canada
2003 24 Min. Gr. 12
This animated portrayal of the Canadian prison system uses penguins as the subjects to present an entertaining yet very realistic and informative perspective of life behind bars. The use of double entendres and puns makes the serious subject matter very interesting to the viewer. It is done in the tradition of prison movies from the 1930s and 1940s, and in the 1950s, movies began portraying women behind bars. While penguins are usually viewed as harmless and amusing birds, they have a "criminal side" in pop culture. This program will serve as an excellent introduction to the discussion of the role of the prison system, life in prison and stereotypes. This program would also be useful in Film Studies. A useful teacher guide is available from Media Group. Suggested Use: Law, Grade 12 - Criminal Law.
Duplication restriced to K-12 schools, colleges and universities only.

Planning for Action: What Determines Health - Part 1
V7982 Saskatchewan Health
1997 80 Min.
The health renewal/reform environment of the 90's has recognized that most of the factors that determine health lie outside the control of the traditional health sector. "Determinants of Health" refers to those basic factors and influences that shape or determine the health of individuals and communities. This program provides an overview of the determinants of health and provides concrete examples of how consideration of specific determinants (eg. personal health practice, income and social status, working conditions) can influence healthier communities. This program provides information on the health and cost benefits of physical activity throughout the life cycle and discusses five action-based strategies that can be utilized to improve health. Three Saskatchewan groups provide examples of creative interdisciplinary partnerships that facilitate the achievement of health related goals.

Playbuilding: The Creative Process
V3087 Classroom Video
1997 28 Min. Gr. 7-12
The experience of Playbuilding is an opportunity to establish, through repetition and reinforcement, a routine that benefits the group as well as the individual. Learning how to work cooperatively requires time to establish productive interpersonal skills and relationships. The experience of productive group work could have a most positive influence for life. The program is in three parts: **warm ups** for skills and physical development, group energy and focus; **playbuilding** for germinating ideas and exploring characters, plot structure and style through improvisation and roleplay with repeated editing and refinement; and **performance** where the product is tested before an audience. Post-production evaluations with the audience as well as within the group are an essential component. This program is a demonstration of one process of Playbuilding that has been edited from weeks of classes that shows the personalities, enthusiasm and talent of a group engaged in one student-centred model of learning. The process, the product and the outcomes can be defined and evaluated after the event in terms of what was learned, what problems were encountered, and what opportunities were suggested for improvement. There are many good ideas for students and teachers in this program. Suggested Use; Arts Education: Drama, Grades 7-12.
Duplication restricted to K-12 schools, colleges and universities only.

La Primavera

V3292 BBC Enterprises

2004 49 Min. Gr. 10-12

La Primavera, an allegorical masterpiece, was painted in Florence in the 1480s by Sandro Botticelli. It was one of the first large secular works since Greek and Roman times, and featured the first sensual female figures of the Renaissance in a city filled with pious Christian images. Now over 500 years old, it remains one of the most perplexing of all the great paintings. Why did Botticelli, whose previous art was conventional Christian images and portraits of the wealthy and powerful, paint La Primavera? Viewers learn that years later, a painting, fixed above an ornamental day-bed, cited in a very old inventory from a Medici house, was recognized as being La Primavera. The Medicis bequeathed the painting to the city of Florence. Botticelli died in poverty and obscurity. Suggested Use: Arts Education, Grade 10-12 - Visual Art. Duplication restricted to K-12 schools, colleges and universities only.

2003 21 Min. Gr. 2-5
This program takes viewers to the "matter kitchen" where they learn to use their senses to identify the properties of objects - size, weight, shape, colour, temperature. They also learn about some of the tools used to measure the properties of matter and that matter has mass, takes up space, and can exist in different states - solids, liquids, and gases. Teacher's guide is available at Media Group or online at www.schoolvideos.com. Suggested Use: Science, Grade 2 - Measuring Matter, Grade 3 - Properties of Matter, Grade 5 - Matter and It's Changes.
Duplication restricted to K-12 schools, colleges and universities only.

Protective Services
V6853 Third Wave Communications
1999 24 Min. Gr. 6-9
This show investigates career opportunities in protective services. While women are seen more often now in front line and key "behind the scene" roles in this sector, they still form a relatively small percentage of the workforce. Still, it's better than just over 25 years ago, when there were no female police officers or military pilots. Today, women are regularly proving their mettle in the air, on the ground, and behind the scenes in a variety of challenging careers. This program features an RCMP officer, a military Helicopter Pilot, and a Fire Protection Designer. Suggested Use: Career Guidance, Grades 6-9 - Career Awareness, Exploration and Planning.
Duplication restricted to K-12 schools, colleges and universities only.

Qui Suis-Je?
V3564 Agency for Instructional Technology
1990 15 Min. G
A la preadolescence, les jeunes vivent des transformations profondes: leur corps change, les relation amicales et affectives prennent de plus en plus de place et ils ont soif d'independance. Ils s'interrogent sur leur identite et sur l'image qu'ils projettent. Ils deviennent plus sensibles a leurs differences et aussi a leurs ressemblances par rapport aux autres. Face a ces grands changements, ils se sentent souvent perdus mais ils sont aussi curieux et avides de connaissances sur la vie et sur eux-memes. On peut les aider a prendre conscience de l'image qu'ils ont d'eux-memes, ce qui les influencera favorablement dans leur capacite de faire des choix, de s'affirmer et de resister a la consommation de drogues.

Raceoff: A Video Workshop
V557 Entertaining Diversity Inc.
1997 18 Min. Gr. 10-12
Raceoff is a tool that helps viewers witness how common labels used on people can be limiting and lead to stereotypes; confirm that there is no way to discern where one race begins and another ends; understand that the way people describe themselves, and the way an observer might identify them, can be very different; recognize that even within certain prescribed groups, individuals might identify themselves in a variety of ways; visualize that not all people from certain groups look alike; remember that we are all the same race. Visual images of people's faces morph into different faces throughout the program therefore making attempts at stereotypical categorization impossible. Suggested Use: Social Studies, Grades 10-12; Psychology, Grades 10-12.
Duplication restricted to K-12 schools, colleges and univerisities only.
EXPIRY DATE: 2006-8-31

Reflecting on Our Work, Video Two
V6633 Saskatchewan Health
1998 57 Min. Adult

This three-video series will be of interest to staff of district health boards, staff and community representatives from the social services, education, justice, agriculture, municipal government, environment and economic development sectors. It will be useful to individuals or groups that use a community development approach in their work. The series, originally produced on January 28, 1998 as a distance education program, was sponsored by Saskatchewan Health in co-operation with the ten-member Interdepartmental Committee on Community Development. Other partners included the Saskatchewan Council for Community Development, Health Canada and Prairie Region Health Promotion Research Centre. Video Two features a panel of community development practitioners. Panelists discuss the information provided in the morning presentations, relating it to their own experiences in community development work. Questions from the studio audience and satellite site participants follow the panel discussion. Panel members include: Michael Clague, Clague Consultants; Linda Pipke, Saskatchewan Council for Community Development; Paul Wilkinson, Social Services; and Laura Sackville, Saskatoon Health District.

Rideau Canal, Ontario
V6588 Good Earth Productions
2002 30 Min. Gr. 12
The Rideau Canal, 202 kilometres long with forty-five locks built in five years from 1826 to 1832, is rated as one of the world's great engineering feats. Hundreds of workers died from malaria and injuries during construction. The project was very much over-budget and its architect, Colonel John By was called back to England in disgrace. Today the Rideau Canal is the longest working original canal on the continent, and in Canada, John By is considered a hero of his time.

Risk Factors and Goals of Prevention in Resiliency
V6648 Saskatchewan Health
1998 85 Min. Adult
This three video series will be of interest to all professionals, community workers and volunteers who work with children, youth and their families. It will also be useful to district health board staff, policy makers, community representatives and staff from the education, social services, justice and municipal government sectors. The series, originally produced on February 18, 1998, as a distance education program through the facilities of the Audio-Visual Division of the University of Saskatchewan and the Saskatchewan Communications Network (SCN), was sponsored by Saskatchewan Health. Donna Benesh and Dennis Chubb, Co-ordinators for the Regina and Saskatoon Regional Intersectoral Committees, moderated the workshop. In Video Two Dr. Paul Steinhauer continues with a discussion of the goals of prevention of risk and sources of resiliency. He provides suggestions on how best to apply these concepts in the workplace, family and community settings and encourages personal reflection on how to make a difference in the lives of children.

River Landforms: From Source to Sea
V521 ClassroomVideo
1996 27 Min. Gr. 8, 10
Using examples from around the world, the program looks in detail at how rivers shape the landscape. It examines the various processes by which the energy of moving water over thousands of years erodes, transports and deposits material to create new landforms. Many typical features are illustrated, such as waterfalls, gorges, meanders and flood plains. The different way in which river valleys develop in granite, sandstone and limestone country is also shown. Many Canadian locations are included in this program. Guide is also available at: www.classroomvideo.com. Suggested Use: Science, Grade 8 - The Moving Crust; Geography, Grade 10.
Duplication restricted to K-12 schools, colleges and universities only.

Robert Kroetsch
V2300 Canadian Council of Ministers
1984 15 Min. Gr. 10-12
Robert Kroetsch, driving to Heisler, Alberta, his home town, explains why he returns there often and narrates 'How Do You Grow a Prairie Town'? In Heisler he talks of his family and his early days and where he learned what poetry is. He drives to the family farm where he was born and remembers when it was a thriving concern. A sequence illustrates the poet as a child, with Kroetsch continuing "How Do You Grow a Poet"? At Battle River Valley he talks about cattle rustling, how the valley shaped his universe and its past Indian history, which leads to illustrate sequences of 'Stone Hammer' read by the poet. The program ends with Kroetsch writing as he sits overlooking the valley.

Rogers Pass - Avalanche Country, Alberta
V3250 Good Earth Productions
2001 24 Min. Gr. 12
In 1881 a search began for a Canadian Pacific Railway route through the Selkirk Mountains. The Rogers Pass was discovered by Major A. B. Rogers and construction began in 1885. Hundreds of lives were lost in the struggle with new technology and avalanches were a constant problem. By 1916 over two hundred railway workers had died at Rogers Pass and Van Horne was tired of the costs involved in keeping the pass open. The pass was closed and another daunting task undertaken - burrowing a tunnel through the mountain. Suggested Use: History, Grade 12 - The Nineteenth Century: The Road to Democracy.

Rogers Pass, B. C.: Crossing the Pass
V1000 Summerhill Entertainment Inc.
2001 25 Min. Gr. 5
Rogers Pass, in Glacier National Park, British Columbia is the meeting point for Jamie and Jennifer as they explore the Columbia Mountain Range that runs west and parallel to the Rockies. Both the railway and the Trans Canada highway pass through the area. It is located in one of the most active avalanche areas in the country. They learn about ski touring in the back country, avalanche safety and rescue courses, and techniques to determine when avalanches might happen. In nearby Revelstoke, not far from where the Last Spike of the Transcontinental Railway was laid, they visit the Revelstoke Railway Museum to see how railway technology has developed from the 1880s to the present. They also visit the Revelstoke Dam, one of the largest concrete dams in Canada, to learn how a dam works and how it can be used to generate electricity. The dam is located on the 2,000 km Columbia River, an important river in western North America with an extensive drainage basin. Suggested Use: Social Studies, Grade 5 - Unit 1; Science, Grades 4-7.

Russia: Where Are Natural Resources Located?

V2541 Agency for Instructional Technology

1993 15 Min. Gr. 10-12

Until recently, Russia was part of the Soviet Union. Beginning in 1989, the republics that made up the Soviet Union began declaring their independence. What had been the Soviet Union became fifteen independent countries. One of these countries is Russia. Russia is rich in resources. But many of the resources discovered during the past fifty years are located in the east, especially in Siberia. Most of the people, however, live in the west. Two case studies, set in Siberia, are developed; one focuses on forest resources and the other on coal. The program also considers examples of resource use in the Netherlands, Japan, and the United States. Students are asked to consider how people's lives are affected by the location of resources. Suggested Use: Social Studies, Grades 10-12.

Sacred Stones: The Saskatchewan Legislative Building (Past, Present, Future)
V590 Partners In Motion
2001 42 Min. Gr. 4,8,12
The Saskatchewan Legislative Building is one of Saskatchewan's most prominent historic buildings. For close to 90 years, the building has played an integral part in the history of our province. Not only is it the centerpiece for government, but it is an important and vital link through tourism and education to our history as a province. In 1997, Saskatchewan Property Management Corporation began a four-year rehabilitation project designed to preserve and protect this important landmark so that future generations can continue to enjoy this provincial treasure. Many interesting and valuable pieces of information about the history of the Saskatchewan Legislative Building and the restoration project are in this program. Because of the significance of this restoration project to our province's history, it is important to share the storied history of the building and the importance of preserving a provincial treasure.

Savarin's Christmas / My Friend Pichou
V4070 Multi Media Group Of Canada
1984 13 Min. Gr. K-5
Savarin's Christmas: One Christmas Eve, a poor beggar calls on Savarin, the old miser of the village. When Savarin refuses to give any hand-outs, the beggar threatens to let everyone know about his fortune. Afraid of the evil powers of the mysterious man, Savarin decides to share this fortune with everyone in the village. My Friend Pichou: Jill has adopted Pichou, a tiny stuffed anteater, as a toy. She introduces him as a true friend she loves and understands. Pichou is glum: he's only happy in the summer because he eats ants. To make it easier for him to wait, Jill tells him about the changing of the seasons. Suggested Use: English Language Arts.

Schizophrenia: Reaching Out - The Importance of Early Treatment
V613
2000 24 Min. Gr. 9-12
The 'Reaching Out' education resource consists of three segments...a video, one lesson each on Schizophrenia and Depression; and a handbook on Schizophrenia. Each segment can be used separately or in concert with another in a classroom setting. The video portrays a classroom experience where a female student notices that a male classmate is very preoccupied and out of step with his classmates and the world around him. The concerned student goes on to consult her teacher and takes the initiative to search the internet for information on mental illnesses and the stigma and myths attached to these disabilities, those directly affected and their families. Through her own example as a good friend, the young lady encourages the entire class to face up to their stereotypes and reach out to her ill friend. The young lady shows further initiative in offering the parents of her troubled friend assistance in accessing the help that he needs. The lesson material clarifies the early symptomatology and impact of Schizophrenia and depression on young people. The handbook elaborates further on signs, symptoms and treatment of Schizophrenia. Suggested Use: Health Education, Grade 9 - Chronic Illness; Life Transitions, Grades 11-12 - Personal Self-knowledge; Psychology, Grade 11 - Unit 5.

Schizophrenia: The Great Disabler of Young People
V1013 Partners In Motion
2000 21 Min. Gr. 9-12
The video portrays a team of presenters, consisting of persons who have Schizophrenia, family members and mental health professionals sharing their personal stories and experiences with a very complex disease of the brain called Schizophrenia. Those directly affected provide vivid and detailed evidence of how an imbalance in their brain chemistry can cause them to experience perceptual changes in what they see, hear, taste, touch and smell. They explain, as well, how this different reality and sense of self makes it difficult for them to explain to others what they feel and think and consequently they are often not believed or understood. The outcome is generally that these persons begin to increasingly isolate themselves and become more and more suspicious. Stressful life events as well as street drugs and alcohol can trigger the symptoms in those persons who are genetically or otherwise predisposed to it. The program goes on to describe that medications, called neuroleptics, can correct the biochemical imbalance allowing persons to live a more normal life. Suggested Use: Health Education, Grade 9 - Chronic Illness; Life Transitions, Grades 11-12 - Personal Self-knowledge; Psychology, Grade 11 - Unit 5.

Servant of God: Berthold Imhoff
V6804 White Pine Pictures
2001 24 Min. Gr. 12
This program tells the story of Berthold Imhoff, a well-to-do German painter who brought religious art to rural Saskatchewan. In 1914 German immigrant, Berthold Imhoff left a successful fresco business in Pennsylvania and settled with his family near St. Walburg. In this rather secluded setting he could devote his time to painting churches and also have some for hunting - a favourite pastime. With the outbreak of World War I and then the Great Depression there was no money for non-essentials such as church decorating. He continued to donate his time and effort and decorated dozens of Catholic churches across the province. In 1921 he built a large studio on his farm, creating the first art gallery in the area. In 1937 Imhoff was knighted by Pope Pius IX into the order of St. Gregory the Great for his generosity to the Catholic Church. Imhoff continued to paint every day in his studio until his death in 1939. Suggested Use: Social Studies, Grade 12 - Culture.

Sharon Pollock
V2299 Canadian Council Of Ministers
1984 15 Min. Gr. 10-12
The program begins with Sharon Pollock in a dressing room talking about her early acting days and how she came to the west from the Maritimes where she was born. Next come two dramatized sequences from Generations. Pollock talks about The Komagata Maru Incident and play structuring, which leads to discussion and dramatization of a scene from 'Blood Relations - the story of Lizzy Borden', an axe murderess in 1892. Pollock talks about being Artistic Director of Theatre Calgary and we see her talking to patrons in the lobby of the theatre prior to a performance of 'Doc', her latest play. The program ends with a short excerpt from 'Doc', performed live on stage. Duplication restricted to K-12 schools, colleges and universities only.

Le Sida Etle Jeunes

V3551 Yaletown Productions

1989 24 Min. A, Gr. 9-12

Does AIDS have anything to do with teenagers? This dynamic half-hour of animation, music, drama and documentary makes a powerful case that it does. Guided by some frank opinions from teenagers, the program shows that times are indeed changing, and that sex, relationships and responsibility are changing too. People with AIDS, including a seventeen year old, talk openly about their struggles and experiences. Dramatic scenes take us from a chilling scenario of what could happen if teenagers ignore the threat of AIDS to a romantic encounter between a couple who find the strength to be honest and responsible. The facts are made clear with the help of an animated sequence from the Academy Award winning animator Jon Minnis and AIDS expert Dr. Catherine Hankins. FRENCH NARRATION.

Sister, Sister (Health Enhancing)

V3505 Agency for Instructional Technology

1990 15 Min. G, Gr. 6-9

Alicia, 11, with her 14 year-old sister Sophia and their mother, has recently moved into a new apartment. Having lost a job recently, their mother is now working at two different fast food restaurants. In spite of the family's problems, Alicia is determined to "have more fun that I ever did in my whole life". With her friend Mary, she swims, learns to play a guitar, joins groups at the community centre, and makes arrangements to buy a second-hand trail bike. She discovers that working at odd jobs to pay for the bike is as much fun as playing. When the bike is finally hers, she and Mary have a wonderful time exploring the countryside. Sophia, meanwhile, starts using drugs, withdraws from family activities, and becomes increasingly desperate for money to support her drug habit. Once Alicia finds her weekly earnings, set aside for a payment on the bike, are missing, she suspects Sophia. Then one morning, the bike is also missing, stolen by someone close enough to her to learn the combination. Alicia finds Sophia's cache of cocaine and resolves not to cover up for her sister any longer. Suggested Use: Health Education, Grade 6 - Drug Addiction and Gambling, Grade 7 - Alcohol and Other Drugs, Grade 8 - Family Structure, Roles and Responsibilities.

The Southern Boreal Forest
V5540 Kelsey Institute
1974 11 Min. Gr. 6-12
To the north of the Saskatchewan River the landscape of the province displays a gradual transition from grassland to forest vegetation. The film identifies the major tree species associated with the southern Boreal: aspen, white spruce, black spruce, tamarack, jack pine and birch. The film concludes with an aerial view of the historically significant Clearwater River Valley.

Standard and Non-Standard Measurement

V615 National Council of Teachers of Mathematics

2000 15 Min. Gr. K-2

When the Monsters decide to build an addition on to their castle, they must inform the carpenters how big they wish the new room to be. The program explores some of the ways children can gain accuracy in measurement taking and in communicating their results. The Monsters progress from describing a room that is "sort of long" to pacing it out and figuring out the number of steps. The contractor, Annie Ant, has her own idea of the size of a step which leads to the development of a standard "Monster Step." The field trip is a visit to a carpenter who explains how human beings use standard measurements in construction. Suggested Use: Mathematics, Grades K-2. V563 Reverie Films
1999 32 Min. Gr. 10-12
Amanda and Ben inhabit a home filled with parental strife. The children process what they see and hear in a fluid imaginary universe where unexpected story fragments arise suddenly and one by one are integrated into their resolute mission of survival. Subterranean Passage tells about the profound influence that parents have upon children. It is also about the boundless resilience of the human spirit and the redemptive power of imagination when one still has the ability to believe completely. Suggested Use: Arts Education, Grades 10-12 - Visual Art; Communication, Production and Technology, Grades 10-12. Duplication restricted to K-12 schools, colleges and universities only.

Summer
V3301 Storytellers Productions
2002 25 Min. Gr. 1-12
How Wesakechak Got His Name: This story is a lesson in humility and working for stature. Wesakechak feels he deserves a more powerful name and convinces his fellow creatures to ask the creator for new names. He stays awake all night to be first in the naming ceremony, falls asleep before dawn, and is so late for the ceremony he ends up with his old name. However, the creator gives him a new job - to become the teacher of the First People. This way he will make his name important, not the other way around. Legend of the Caribou: Caribou herds became so large that they threatened the life of plants and other creatures that lived on the Barrens. When the caribou refused to move or share, the other animals asked the Creator for help. Since then, swarms of mosquitoes and flies force the caribou to move to other pastures; hence, the longest yearly migration of animals on Earth. Suggested Use: Arts Education, Grades 1-12 - General; English Language Arts, Grade 3 - Social, Cultural and Historical Context, Grade 4 - Imaginitive and Literary Context; Health Education, Grades 3-4 - Self-esteem, Social Relationships; Native Studies, Grade 10 - Unit 2 Community and Kinship Science, Grade 3 - Animals; Social Studies, Grade 9 - Culture.

The Sunflowers
V3293 BBC Enterprises
2004 50 Min. Gr. 10-12
The Sunflowers by Van Gogh is one of the most famous works of art in the world. The painting, inspired by a bunch of flowers that Van Gogh found lying in a gutter, was a favourite of the artist who made ten versions of the original. The original version led to his friendship with Paul Gauguin with whom Van Gogh planned to set up an artist's school in Aries, France. Very shortly they had a falling out and parted badly. Soon after, Van Gogh ended his own life. His coffin was covered with the sunflowers he loved. It was after his tragic death that Van Gogh's work began to receive the acclaim it deserved. The sunflower studies are rich in religious and mystical symbolism. Suggested Use: Arts Education, Grade 10-12 - Visual Art.
Duplication restricted to K-12 schools, colleges and universities only.

Swamp Angel
V1155 Weston Woods
2001 14 Min. Gr. 4, 5
In this original tall tale, written by Ann Isaacs, illustrated by Paul Zelinsky, Angelica Longstrider, also known as Swamp Angel, becomes the greatest woodswoman in Tennessee history. She was born scarcely taller than her mother and didn't build her first log cabin until she was two years old. When a large bear known as Thundering Tarnation can't control his bottomless appetite, Swamp Angel musters up all her strength, in the tallest tale of all, to deal with him. Illustrated in the primitive style of early American painting, the story presents a heroine to match other giants of folklore. Supporting print material is available at: http://teacher.scholastic.com/products/westonwoods. Suggested Use: English Language Arts, Grades 4, 5.
Duplication restricted to K-12 schools, colleges and universities only.

Talkin' About AIDS
V3552 Shane Lunny Productions
1989 27 Min. A, Gr. 9-12
Does AIDS have anything to do with teenagers? This dynamic half-hour of animation, music, drama and documentary makes a powerful case that it does. Guided by some frank opinions from teenagers, the program shows that times are indeed changing, and that sex, relationships and responsibility are changing too. People with AIDS, including a seventeen year old, talk openly about their struggles and experiences. Dramatic scenes take us from a chilling scenario of what could happen if teenagers ignore the threat of AIDS to a romantic encounter between a couple who find the strength to be honest and responsible. The facts are made clear with the help of an animated sequence from Academy Award winning animator Jon Minnis and AIDS expert Dr Catherine Hawkins. Suggested Use: Health Education, Life Transitions.

Thanks, But No Thanks (Peer Pressure)
V3503 Agency For Instructional Technology
1990 15 Min. G, Gr. 5-7
Lenora and her friend Karen, both 12, meet Karen's 14 year-old brother and his friends at the mall near the end of the summer before they leave the elementary school to enter junior high. Karen, particularly, is eager to seem cool and impress Robert and Michelle, who are popular class leaders. During their day at the mall, they discover that Michelle shoplifts, smokes and tries to tease or belittle the others into joining her. Lenora is disturbed, but Karen persuades her to stay with the group. Soon they run into two 16 year-old boys, friends of Michelle's older brother. These boys invite the group to join them on the beach where they produce a bottle of vodka to "spike" everyone's orange drink. Lenora refuses, and after a moment so does Karen. Then, after some hesitation, Robert also hands back his drink, saying that he's "in training". Suggested Use: Health Education, Grade 5 - A Healthy Body, Safety, Self-esteem, Social Relationships; Grade 6 - Drug Addictions and Gambling; Grade 7 - Alcohol and Drugs, Assertiveness Skills.

The Third of May
V3294 BBC Enterprises
2004 49 Min. Gr. 10-12
The Third of May 1808 was painted by Don Francisco Goya in 1814. It was the first painting to put the victims of war centre stage. Goya was the chief court painter to the Bourbon royal family of Spain, and this painting was very different from conventional expectations of war painting. Instead of glorifying the King, the army, or the state, Goya focused on a group of frightened anonymous men being shot at point blank range by a firing squad. The King wanted nothing to do with this official commission for which Goya had been asked to depict "the most notable and heroic actions of our glorious insurrection against the tyrant of Europe". The event that Goya chose to paint, occurred in May 1808, when the people of Madrid rose up against the Napoleonic occupation, and French troops brutally suppressed the uprising. Hundreds of people were rounded up and shot in the night. Suggested Use: Arts Education, Grade 10-12 - Visual Art.

The Truth About Tobacco
V586 Cambridge Research Group

1991 30 Min. G
In this program, startling interviews with people stricken with smoking-related illness are contrasted with teen interviews demonstrating attitudes of self-deception. Each scene provides insights into why teens start, why it's so hard to stop, and why our society allows tobacco companies to promote a lethal drug. The degree to which tobacco is economically entrenched in our system is scrutinised. The immediate consequences of smoking - bad breath, stained teeth, odours that linger in clothing and hair - are graphically depicted, as well as more serious consequences like terminal illness. Duplication restricted to Province of Saskatchewan.

U-Turn
V1351 Tabata Productions Associates
2000 22 Min. Gr. 8
Regular bombardments by the media urge viewers to both consume and conserve, creating a mixed and confusing message. In order to foster better conservers it is important to address "why we consume" and not simply "how". U-Turn, with teen host Severn Cullis Suzuki, clearly illustrates for a youthful audience the environmental problems created by consumption. It offers practical solutions for reducing solid wastes, eliminating hazardous household products, conserving energy and water and improving air quality while examining the underlying role that the media plays in influencing our values and how we live. Suggested Use: Health Education, Grade 8: Protecting the Environment and the Health of the People; Science, Grade 10 - Sustainability of Ecosystems.

Vancouver Island, B. C. : Land of Totems
V998 Summerhill Entertainment Inc.
2001 25 Min. Gr. 5
Jamie and Jennifer visit Vancouver Island, the largest island off the west coast of North America. They learn more about Cowichan First Nation history and visit the Quwutsun Cultural and Conference Centre where they meet Master Carver Simon Charlie who shows them how totem poles are carved and explains what the designs signify. At Horne Lake Caves Provincial Park they learn why the island is known as the island of caves, how the caves were formed and the fascinating formations that exist. In this park are seven limestone caves about 120,000 years old. At MacMillan Provincial Park they explore Cathedral Grove where Douglas Firs over 800 years old can be found. The ranger explains why this ecosystem allows for the growth of such magnificent trees. They learn about fallen trees that become nurse logs that provide nutrients to the remaining trees as they decay and open up the canopy above to let light in to encourage new growth. Suggested Use: Social Studies, Grade 5 - Unit 1; Science, Grades 4-7.

Vimy Ridge - The Soldier's Story, France
V3247 Good Earth Productions
2001 24 Min. Gr. 12
At dawn on April 9, 1917 the Canadian trenches facing Vimy Ridge erupted with fire during one of the most devastating barrages of World War I. This battle at Vimy Ridge became the most influential battle of World War I and the model for the great allied offensive of 1918. It showed how innovative tactics combined with great courage and self-sacrifice enabled Canadian soldiers to turn a field of slaughter into a field of glory. The memorial at Vimy Ridge is one of only two National Historic Sites outside of Canada. The land was donated by the French government and houses a massive sculpture memorial, preserved underground trenches, a burial ground for Canadian soldiers and a park created to resemble the woods and forests of Canada. Suggested Use: History, Grade 12 - External Forces and Domestic Realities.

War Spin
V3303 BBC Enterprises
2001 44 Min. Gr. 11
This program looks at the inside story of how the Pentagon put journalists into the front line of its war on Saddam to bolster its case for victory. It traces the roots of the controversial tactic of embedding cameras and reporters with military units. The purpose was to capture images that would swing public opinion in support of the war in the UK and USA, and encourage Iraqis to believe Saddam's grip had loosened before it actually had. The program looks at who said what when to shed new light on the information campaign, looks at the bombing of Bagdad markets, and the embedded journalists tell about restraints that were placed on them. Suggested Use: Social Studies, Grade 11 - Unit 5; History, Grade 11 - Unit 5.

Water Supply in Canada
V523 Classroom Video
1998 26 Min. Gr. 7, 10
Water is the most essential element to life on earth. Viewed from space the earth looks to be a water planet. Over 70 per cent of the globe's surface is covered by the world's oceans with less than 3 per cent made up of freshwater, three quarters of which is frozen in the polar or alpine regions. With such a small portion of water available to all forms of life it is strange we are not better stewards of our most precious resource. In Canada we have a greater abundance of freshwater than any other country in the world. As the effects of global warming, El Nino, increasing population pressures, and water contamination begin to take a greater effect on water resources of the world, we must work to prevent the destruction of this most important resource. Guide is also available at: www.classroomvideo.com. Suggested Use: Science, Grade 7 - Renewable Resources in Saskatchewan; Grade 10 - Water Quality.
Duplication restricted to K-12 schools, colleges and universities only.

1980 28 Min. G
This program gives an overall view of the twenty-three sporting events of the 1979 Western Canada Summer Games, including a history of the games. This film illustrates the number of athletes, coaches, officials and volunteers involved. It also gives an idea of the training and preparation involved and features the marathon event.
EXPIRY DATE: Perpetuity
SPONSOR: Family Foundation

Wet
V3306 BBC Enterprises
2002 50 Min. Gr. 10-11
Water is the centre of all our weather, causing rain, storms, monsoons and floods. Viewers visit the wettest place in Europe - Bergen, Norway where it rains 265 days a year and the wettest place in the world, India, where 25 billion tons of water fall each day during the monsoon period. Next, following the Thermohaline Conveyor (density driven, global ocean circulation, sometimes called the Conveyor Belt, which moves warm water towards the poles and cold bottom waters towards the Equator) viewers observe the warm seas of the Caribbean and the great power of floods. The devastating effects were seen in Honduras in 1998, where 75 inches of rain fell in a week. The opposite occurs in Texas where there is no rain and farmers hope to find a way to manufacture it. Suggested Use: Science, Grade 10 - Weather Dynamics.
Duplication restricted to K-12 schools, colleges and universities only.

What's the Noise? / Jeremy and Michael

V4087 Multi Media Group of Canada

1984 14 Min. Gr. K-5

What's the Noise? - A brown bear awakes from deep sleep and hears a funny little noise: thump-thump, thump-thump. "What's that noise?", he asks himself. It is not like a mouse's squeak-squeak, a bird's peep-peep or a frog's ribit-ribit. All season long he searches for the answer. Jeremy and Michael - Jeremy lives in a mobile home and Michael lives in an apartment. Both would like to befriend each other but they are told they cannot. One day they disappear. Worried, their mothers look everywhere. Later, Jeremy and Michael are found, asleep together. Suggested Use: English Language Arts, Grades K-5.

Duplication restricted to K-12 schools, colleges and universities only.

Wheat

V3246 DeBeck Educational Video

1997 31 Min. Gr. 5

This program follows the work that takes place on a family wheat farm from seed cleaning and planting through to harvest. It also visits a flour mill and pasta plant. On a visit to a pioneer village viewers see wheat flailing, winnowing, and wheat milling at a gristmill. Children are seen growing their own wheat seeds, pounding wheat kernels into flour, and testing for starch in flour. They also roll chapatis, toss pizza and enjoy spaghetti. They take part in wheat weaving and sing "The Wheat Waltz". An ancient Egyptian model of bread making demonstrates the importance of wheat in Egypt, as does the story of Joseph and his interpretation of the pharoah's dream. Suggested Use: Science, Grade 5 - Plants: Structure and Function, Machines and Work; Social Studies, Grade 5 - Unit 3.

V703 King Screen Productions Division
1979 41 Min. G
A feature film based on the novel by W. O. Mitchell, presents a moving account of one boy's realization of what it means to be a man. Brian is ten years old and growing up in a small prairie town set in the vast dust bowl that was Saskatchewan during the Dirty Thirties. He is faced with the finality of death and the irrepressible force of new life. 'The Making Of Who Has Seen The Wind',(V704)relates the experiences in making the feature, from the idea and planning stages to the premiere showing in Arcola, Saskatchewan, chosen as the setting for this production.

Who We Are: A Celebration of Native Youth
V8440 Kem Murch Productions
1992 35 Min. Gr. 5-9
This video features candid, action-oriented profiles of young Native people, their elders and other inspiring native role models across Canada. It provides positive messages to Native youth about continuing their education, valuing their culture and making their own unique contributions to their communities - both urban and rural. From a Haida potlach in B.C., to an Inuit Elder's igloo, to a Native rock concert in Quebec - Native youth are invited to share in a spirit of pride and celebrate who they are. Suggested Use: Social Studies, Grade 5 - Unit 2; Canadian Studies, Grade 12; Student/Teacher Reference; Native Studies, Grade 12 - Social Development.
Duplication restricted to K-12 schools, colleges and universities only.

Wilderness
V9280 Agency For Instructional Technology
1988 29 Min. Gr. 10-12
The United States was formed by its need to tame and exploit the wilderness, but since 1890 there has been no frontier. We have been insulated in a technological cocoon, but biologists, medical scientists, psychologists, ecologists and climatologists understand the value of untouched nature. Programs such as Outward Bound are built on the character-building and therapeutic effect of the wilderness. The fate of the wilderness depends on society's attitude. In a technological society, we need to manage our wild lands wisely.

Wind
V3307 BBC Enterprises
2002 50 Min. Gr. 10-11
This program looks at how weather works and explains the strange and almost unbelievable connections between weather conditions in different parts of the world. This program explores the journey the winds take from their birth at the equator to the North Pole. Without wind the earth would be full of extremes; it brings relief from heat but causes devastation through tornadoes and typhoons. Viewers learn about the devastation caused by Hurrican Andrew in the USA and how the fastest wind on earth, the jet stream, was put to use by the Japanese in World War II. As well, viewers see how wind can turn from the cooling breeze on a summer day to a devastating tornado, and how a wind from space can cause considerable damage.
Suggested Use: Science, Grade 9 - Atmosphere, Grade 10 - Weather Dynamics.
Duplication restricted to K-12 schools, colleges and universities only.

Winter
V3220 Storytellers Productions
2000 24 Min. Gr. K-12
This program combines animation and live action in the telling of two traditional First Nation stories. Why the Rabbit Turns White is a story that is brought to life by animated characters inspired by the Ojibway artist Norval Morrisseau, and recounts the adventures of Cree teacher and trickster Wesakechak. It tells the story of how the Great Spirit rewarded the rabbit for his courage after a great drought and starvation. The second story, Legend of the Spirit Bear, is voiced by Tantoo Cardinal, who represents Mother Wolf. She tells her cubs a bedtime story about the ancient origins of rare white bears that live by the Pacific Ocean. The Kermode Bears are a rare species of black bears that are pure white and known as Spirit Bears. Shared Visions: The Art of Storytelling, the "making of" documentary, is a complement to this program that recounts the challenges and experience of making Stories From the Seventh Fire.
Suggested Use: Arts Education, Grades 1-12 - General; English Language Arts, Grade 3 - Social, Cultural and Historical Context, Grade 4 - Imaginative and Literary Context; Native Studies, Grade 10 - Unit 2 Community and Kinship; Science, Grade 4 - Vertebrates and Invertebrates; Social Studies, Grade 9 - Culture.

World Population Issues: How Many Is Too Many?
V524 Classroom Video
1998 27 Min. Gr. 11
This program presents a historical background to world population growth, and different perspectives on how many people the planet's resources can support. Using sample studies in India, Rwanda and China, the program explores the issues surrounding population growth and change. In India fertility rates vary between rich and poor states. Fertility rates are influenced primarily by the education and status of women and cultural beliefs. In 1994 the mass migration of people out of Rwanda caused significant population change. Refugee camps were established in neighbouring countries and a host of problems emerged. China's One Child Policy has been a radical but effective means of controlling population growth. However, it does raise important moral issues about gender bias and the role of governments in family planning. Guide is also available at: www.classroomvideo.com. Suggested Use: History, Grade 11 - Global Issues; Social Studies, Grade 11 - Population.
Duplication restricted to K-12 schools, colleges and universities only.

Wrestling With the Spirit: A Doukhobor Story
V6803 White Pine Pictures
2001 24 Min. Gr. 12
In April, 1899, Vany and Loosha Perverseff came to Canada with 2300 other Doukhobors, the third and final wave of Doukhobor immigrants to Canada. Simple, devout, and mostly illiterate peasants, the Doukhobors were pacifists, and refused to join Czar Nicholas II's military. For this and their rejection of the Russian Orthodox Church, many Doukhobors, including some of Vanya's family, were forced from their land, arrested and tortured. The Perverseffs settled in Saskatchewan and started a new life as farmers. Vanya helped to establish the first school for Doukhobor children in his district. His eldest son became one of the first Doukhobor medical doctors to graduate in Canada. The original family homestead still stands in Blaine Lake, Saskatchewan. Suggested Use: History, Grade 12 - The Nineteenth Century: The Road to Democracy; Social Studies, Grade 12 - Culture.

Yellowknife, Northwest Territories: The Territories Treasures
V3602 Summerhill Entertainment Inc.
2002 25 Min. Gr. 5
In Yellowknife viewers meet young cross-country ski champion, Sarah Stephen, who introduces such landmarks as the Bush Pilots Monument and a small houseboat community on the lake. At Sirius Diamonds chunks of rock are cut and polished into some of the world's finest diamonds. Following a short flight to the town of Fort Resolution on the south side of Great Slave Lake, biologists with the Hook Lake Bison Recovery Project are breeding a disease-free herd of bison in an attempt to strengthen the population of one of North America's largest land animals. Jay demonstrates how diamonds are formed and make it to the earth's surface. Suggested Use: Social Studies: Grade 5 - Unit 1; Unit 2; Unit 3; Science, Grades 4-7.
Duplication restricted to K-12 schools, colleges and universities only.

York Factory - The Most Respectable Place, Manitoba
V3249 Good Earth Productions
2001 24 Min. Gr. 12
York Factory is the oldest permanent settlement in Canada and was established in 1684. It was the most important of the Hudson Bay Company posts and at its peak had over fifty buildings. York Factory is now protected as a national historic site but it is falling victim to the extreme climate and erosion on the northwestern shore of Hudson Bay. A huge white building sits nearly abandoned on the shore. Cree elders born at York Factory reunite there each summer to visit and celebrate the crucial role their ancestors had in the fur trade. Suggested Use: History, Grade 12 - Relationships: People and Paradigms.
Duplication restricted to K-12 schools, colleges and universities only.

Young Competitors
V531 TV Ontario
1999 25 Min. Gr. 1-9
Portraits of children participating in various competitive pursuits introduce some not typically seen, such as lacrosse and ballroom dancing. Viewers see that competition can take place on a thinking level, as in chess, and observe competitive skills such as strategy, teamwork, practice, and motivation. Children discover the satisfactions of healthy competition, goal-setting and achieving! Segments feature young people on a lacrosse team, a synchronized swim team, a young chess champ, two ballroom dancers and those meeting the challenge of participating in a triathalon. Suggested Use: Career Guidance, Grades 6-9 - Career Awareness, Exploration and Planning, Physical Education, Grades 1-5 - Personal/Social/Cultural, Grades 6-8 - Developmental Games and Sport.

Young Heroes: Louis Braille
V3054 Protocol Entertainment Inc.
1997 36 Min. Gr. 4-9
When Chris makes a frantic search on the World Wide Web for information to complete his school report, the last thing he expects is to be transported to 19th century France, and be swept up by young Louis Braille's dogged determination to develop an alphabet for the blind. The video description provides a concise narration of the visual aspects of the program. Woven into the soundtrack in a way that complements the dialogue and sound effects, this added narration enables people who are blind or with impaired vision to follow and appreciate the program more fully. Available in English and French. Suggested Use: Health Education, Grades 4-9.
